COUNSEL TO SEEK INJUNCTION

Would Halt Flow of Oil from Naval Reserves.

SENATORS TO BE QUESTIONED

Suspected by Investigating Committee of Having Made Fat Profits by Speculating in Sinclair Oil After Being "Let In" by Some One. Strong Pressure Brought to Bear Against the Oil Probe, It Is Said.

Washington, Feb. 6.—An injunction preventing E. H. Doheny and Harry Sinclair from taking any more oil of the navy's oil reserves will be sought by Silas H. Strawn and Atlee Pomerene, the president's special counsel in the oil fraud cases, just as soon as their appointment is confirmed by the senate.

An enormous pressure is being brought to bear upon Senator Walsh and other members of the senate investigating committee, to induce them to abandon further probing of those implicated in the oil scandal. The enemies of the investigation are raising the cry that the welfare of the republic is at stake.

Four senators, all of them members of the well known "poker crowd" at the capital, were added to the list of government officials suspected by the committee of having made fat profits by speculating in Sinclair Oil after being "let in" by some one.

Harry F. Sinclair, who will sail for the United States on February 12 on the liner President Harding, will be summoned to appear before the Walsh committee and asked to produce the books of the Hyva Corporation, his private investment company. Hyva checks, in the testimony of Archie Roosevelt, were reported to have been sent to the foreman of Fall's ranch at Three Rivers, New Mexico, in the amount of \$68,000.

Immediately upon convening tomorrow, the senate by resolution will legalize the continued work of the Walsh committee, whose life, Fall contended on Saturday, expired with the last session of congress. Fall will therefore be plainly breaking the law if he refuses to testify on Friday before a duly authorized committee of congress.

The Standard Oil company of California was dragged unwillingly into the picture. Their attorney, Oscar Sutro, failed to persuade Senator Walsh of the legality of the Standard Oil's claims on section 36 of the naval reserve No. 1. When the senate meets Thursday Walsh stands to call up his sleeping resolution calling upon the president to have his special counsel proceed against the Standard Oil in section 36 just as against Doheny and the rest of the reserve.

For Friday the Walsh committee announces the biggest day yet. It will call ex-Secretary Fall, Carl K. Biggeman, an official of the Chase National bank of New York, as well as ex-Secretary of the Treasury McAdoo, ex-Secretary of the Navy Daniels and George Creel, three of the victims of Doheny's artillery on last Friday.

Insurgents in the senate have decided to oppose confirmation of Atlee Pomerene as Democratic prosecutor in the oil fraud cases. They claim the discovery of certain facts which they believe will help them. Pomerene was a member of the senate when the oil lease bill was passed. Senator LaFollette offered two vital amendments against the bill. One amendment was to strike out a section designed to permit the navy oil lands to be leased. Pomerene voted against the amendment. It was rejected. His other amendment authorized the government to fix the price of any oil removed from the public lands. Pomerene voted against it. The amendment was rejected.

HERE AND THERE

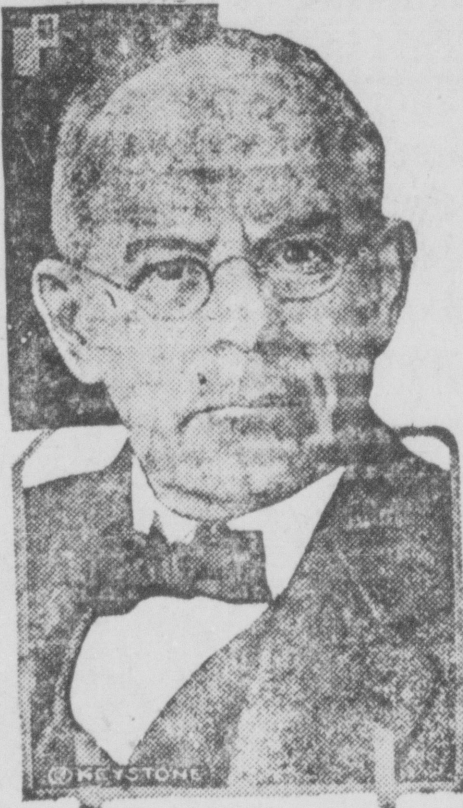

The \$15,000,000 "back pay" suit against the Pennsylvania railroad by System Federation No. 90, which claims to represent over 60,000 of the employees in the six shopcrafts, was dismissed by Federal Judge Dickinson at Philadelphia.

Robert E. Wood, 51, former postmaster, was shot to death at Charleston, W. Va., following an affray with police. Wood, who is alleged to have been crazed by drink, had shot and wounded Patrolman Ben I. Comer.

House of representatives approved a section of the treasury appropriation bill which would provide \$10,029,770 for prohibition enforcement during the coming fiscal year.

DR. J. CATTELL

President American Association For Advancement of Science.

MENACE TO INCOME TAX

Expert Assails Tax Exempt Securities Before Ohio Farmers.

Columbus, Feb. 6.—John C. Watson, taxation expert of the Illinois Agricultural association, speaking to Ohio farmers at the meeting of the Ohio Farm Bureau federation at Ohio State university, declared that tax exempt securities were a menace to the income tax system of the United States. He said it was futile to increase present surtax rates or even maintain them as at present until the issue of tax exempt securities is stopped.

Tax exemptions, said Watson, are "breaking down the income tax, both state and national."

Of the basis for taxing property, Watson said: "Taxation of property is almost always based upon its fair cash or market value. It is coming to be recognized that producing value, not what it is producing, but what it could be expected fairly to produce, would be a better basis."

Watson produced figures to prove that farmers are carrying at least their share of the taxation burden.

TAX REDUCTION BILL READY FOR HOUSE

Republican Members Complete Its Consideration.

Washington, Feb. 6.—Consideration of the Mellon tax reduction bill has been completed by the Republican members of the ways and means committee.

The vote ordering it reported to the house will be taken at a perfunctory meeting of the whole committee tomorrow, when the Democrats will be called in for the first time since they were shut out for alleged partisanship in connection with the surtax schedule.

A favorable report on the measure is certain. The Republicans, who have a majority in the committee, are all pledged to vote it out as agreed upon by a majority of their own side. Chairman Green intimated the Democrats will not even be given an opportunity to offer the plan as a substitute.

After the final vote Chairman Green will make public the revised text of the bill and issue an official summary showing the contents and changes made in the Mellon draft. Most of these changes are relatively unimportant, the Mellon surtax and normal tax rates remaining intact. Formal report of the bill to the house will be made Monday.

The last two features of the bill finally whipped into shape were the Green proposal for a flat reduction in this year's taxes on last year's income and the jewelry tax. The percentage cut in the Green amendment definitely was fixed at 25 per cent, as originally advocated by the chairman.

German Flag at Half Mast.

Washington, Feb. 6.—Following a protest from Paul J. McGahan, local commander of the American Legion, German embassy officials ordered the embassy flag flown at half mast today in respect to the memory of Woodrow Wilson.

Woman Found Guilty.

New York, Feb. 6.—Mrs. Josephine Fenger, the woman charged with branding her two stepchildren "because they told lies," was adjudged guilty as charged and the court will pass sentence Feb. 26.

TRIBUTE TO DEAD PAID BY WORLD

Woodrow Wilson at Rest in Nation's Capital.

LAST RITES ARE IMPRESSIVE

Simple Services Held at the Home and Chapel in Presence of Immediate Relatives, Intimate Friends and High Officials—Lowering of Casket in Crypt the Signal For Nationwide Tribute.

Washington, Feb. 6.—The world today paid homage to Woodrow Wilson. On land and sea the booming guns of the United States army and navy carried the tidings that a great commander was being buried in the capital of the nation.

Tolling chimed to the people that, in the unpretentious home where he suffered and died after leaving the most powerful office at the gift of mankind, simple rites were being said for him to whom the world turned in its hours of need.

Beneath the inscription: "The way of peace," the body was borne tenderly into Bethlehem chapel, where, storied in stone, wood and glass, is the birth of Him who came 1924 years ago to bring peace to the world. There were said the last sad rites, in the presence of a few hundred immediate relatives, intimate friends and high officials and diplomats. And then, to the last words of the simple service, the casket was lowered into the crypt, there to rest until the completion of the massive national cathedral furnishes a suitable abiding place for the body of the first president to be buried in the nation's capital.

The lowering of the casket was the signal for a nationwide tribute. In many cities all activities paused for two minutes in silent respect for him who has gone.

The services combined those of the Presbyterian church, to which Mr. Wilson belonged, and those of the Protestant Episcopal church, of which Mrs. Wilson is a member. At the home the rites were opened with the reading of the twenty-third Psalm by the Rev. James H. Taylor, pastor of the Central Presbyterian church, where Mr. Wilson worshipped as president. The Rev. Sylvester Beach, the dead leader's pastor at Princeton university, then offered a short, extemporaneous prayer. Bishop James E. Freeman of the National cathedral closed the spoken service with selections chosen by Mrs. Wilson from among those to which the former president was devoted.

After the home services the body was taken in a hearse to Bethlehem chapel, 24 members of the American Legion acting as escort.

At the chapel were members of the present cabinet, the supreme court, the special delegations from the house and senate, the chief of each diplomatic mission in Washington and his wife, four representatives of the American Legion, four representatives of the American Federation of Labor and a few others asked in accordance with the wishes of the Wilson family.

President and Mrs. Coolidge attended services at both the Wilson residence and the chapel.

Mr. and Mrs. William G. McAdoo arrived from California this morning for the services.

CANDLER WINS SUIT

Federal Jury Returns Verdict Against New Orleans Belle.

Atlanta, Ga., Feb. 6.—The federal court jury in the \$500,000 heart balm suit of Mrs. Onezima DeBouchelle against Asa G. Candler returned a verdict in favor of the defendant. Mrs. DeBouchelle sued the aged millionaire manufacturer of soft drinks after he had broken his engagement to wed her on the ground that she had been visited by strange men in her room at an Atlanta hotel during the reunion of Confederate veterans.

Mrs. DeBouchelle, beautiful New Orleans belle, vehemently denied Candler's accusations. She said she filed the suit in defense of her character. She introduced dozens of love letters written by the millionaire, in which most endearing terms were used in an effort to show that he had pressed his suit with ardor.

Candler, replying to the charges, introduced letters he had received from Mrs. DeBouchelle, intending to prove that she proposed marriage to him and that at the time she did so she was a married woman, her previous divorce having been obtained illegally, it was claimed.

ELIZABETH WURTHMANN

New Jersey Girl Left Sole Heiress to Estate of Recluse.

DOINGS IN OHIO

Finds Long-Lost Daughter.

Cincinnati, Feb. 6.—Mrs. Beatrice Stein of Avondale clasped the arm of a tall young woman, with whom she left a train at the Central Union station. Her companion was Mrs. Irene Raynor of Boston, her daughter, for whom she has searched for 19 years. Since 1905, Mrs. Stein declares, she has tried to find her child. In that year, while the family was living in Chicago, her daughter was taken from her. In the same city the other day they met for the first time.

Jury Finding Affirmed.

Cincinnati, Feb. 6.—The first district court of appeals has sent to the common pleas court at Circleville, O., an opinion affirming the jury finding, sustaining the will of Nelson Hitler, who died on his farm near Circleville in 1913. The estate is said to be valued at \$300,000, including 2,300 acres of land. Hitler was a bachelor and relatives attacked the will because he made a large bequest to the centralized school of that county, alleging "eccentricities."

Youth to Die in Chair.

Akron, O., Feb. 6.—Alexander Kusczik, 19, was condemned to death by a jury which returned a verdict of guilty of first degree murder against him, without a recommendation of mercy. Kusczik beat Elizabeth Nagy, his 13-year-old cousin, to death with a hammer Nov. 6, in her home, during her parents' absence.

To Run One-Man Cars.

Springfield, O., Feb. 6.—One-man streetcars will be placed in operation in this city within the near future. Plans of the street railway company meet the approval of the city commission. The car company declares that under present operating methods, it is unable to keep up with its obligations.

Falls From Viaduct.

Columbus, Feb. 6.—Without regaining consciousness, Louis Christian Weber, 71, local dry goods merchant, died in St. Francis hospital from internal injuries sustained when he is thought to have fallen from a viaduct.

"Flapper" Bandit Pleads Guilty.

Cleveland, Feb. 6.—Mrs. Anna Kerns, 21, the "flapper" bandit, pleaded guilty before Common Pleas Judge McMahon to a charge of robbing the Benfield Drug company of \$38 on Jan. 24. Sentence was deferred.

Boulay Favors Gasoline Tax.

Springfield, O., Feb. 6.—A tax on gasoline as a means of raising funds for road work in Ohio was advocated by State Highway Director L. A. Boulay in an address before the Springfield Kiwanis club.

Gunshot Wounds May Prove Fatal.

Lima, O., Feb. 6.—Rolf Lee, 28, is in a serious condition from gunshot wounds received, it is charged, when he attempted to rob a filling station manned by John Dawson here.

Centenarian Dead.

Cincinnati, Feb. 6.—Luther H. Marsh, 100 years and 8 days old, whose parents came to Cincinnati by wagon from New Jersey, died at his home here.

Order Hits German Flappers.

Berlin, Feb. 6.—The German flapper has been barred from the offices of the Prussian finance minister. The finance department has issued an order forbidding "female employees" to wear, during office hours, dresses which leave uncovered, or covered only with transparent materials, parts of the chest or back. Offenders are threatened with dismissal. The order does not state any objections to short skirts or silk stockings.

TO HOLD PARLEY AT CAPITAL

Political Advisers of McAdoo to Discuss Situation.

MAY MEET ON THURSDAY

Gathering, It Is Said, Will Determine Whether the Former Secretary of Treasury Shall Remain in Race For the Democratic Presidential Nomination—Sequel of Disclosures in Oil Lease Probe.

Washington, Feb. 6.—Political friends and advisers of William Gibbs McAdoo are gathering here for a conference to determine whether the former secretary of the treasury shall remain in the race for the Democratic presidential nomination.

The conference, it was learned, will take place probably on Thursday. His advisers will take stock of the situation precipitated by the disclosures last Friday before the oil lease investigating committee. The testimony of Edward L. Doheny was to the effect that he had paid McAdoo \$250,000 for his services as counsel after he left the Wilson cabinet.

Daniel R. Roper, former internal revenue commissioner under McAdoo, who has been in charge of his Washington headquarters, admitted that he and other friends would discuss the situation with McAdoo.

Did Woodrow Wilson frown upon McAdoo's legal connection with the Doheny oil interests? Is a question being asked here in political circles as the oil reserve case resumes first place in public interest following the death of the former president.

By many observers it is asserted there are grounds for believing Mr. Wilson disapproved of his son-in-law's action, particularly after the consummation of leases turning over the California reserves to the multi-millionaire operator. Mr. McAdoo, they say, was very close to Mr. Wilson up to the time he was retained by Doheny, shortly after he resigned as secretary of the treasury in 1913. His visits to the white house, however, became rare after this event, and since Mr. Wilson's death private life, three years ago, he was but an occasional guest at the S street home, though he did dine there on his last two visits to Washington the latter half of last year. Strangest of all, Mr. Wilson never signified approval by word or sign of McAdoo's potential presidential candidacy on the Democratic ticket, it is said.

WANTS THE FACTS

Norris Would Probe Report That Certain Senators Bought Oil Stock.

Washington, Feb. 6.—Senator Norris, leader among the Republican progressives of the upper house, issued the following statement:

"I am informed there is a report current that a number of senators and other high government officials in Washington bought Sinclair Consolidated oil stock before the announcement of the lease by Secretary of the Interior Fall to Sinclair of Teapot Dome and then sold that stock after the announcement of the lease when the market had risen. In my judgment the committee ought to go to the very bottom of the entire matter and permit no avenue of escape for anybody, regardless of the position he may hold. I think the facts could be very readily ascertained if the committee would issue a subpoena, returnable forthwith, directing the proper officer of the New York stock exchange to appear before the committee with the books that would show all the stock dealings from Washington covering the time specified."

LIONESS BEHEADS MAN

Beasts Get Out of Hand During Filming of Play "Quo Vadis."

Rome, Feb. 6.—While a set in the play "Quo Vadis" was being filmed, depicting the combat of the Christians with the wild beasts, in which 20 lions and several tigers are employed, a lioness suddenly jumped among the 50 actors who were enacting the part of Christians. The lioness lifted a man with her jaws, inflicting 12 wounds, finally biting off his head. A desperate encounter followed, the beasts getting out of hand. The lioness was afterward killed, while several actors were injured and trampled upon during the panic.

Auto Accident Fatal.

Cincinnati, Feb. 6.—Mrs. Helen Bloyer, 70, of Buckner, died of a heart attack following an automobile accident near New Richmond.

EXPERTS TO REPORT SOON

Investigation of Germany's Capacity to Pay Drawing to a Close.

Berlin, Feb. 6.—The investigation by the reparation commission's committee of experts of Germany's capacity to pay is drawing to a close.

The committee headed by Reginald McKenna, which is probing the flight of German capital to foreign countries, expects to leave Berlin Friday. The committee headed by General Charles G. Dawes, which is delving into German economic conditions, expects to follow Saturday. Both committees will reassemble in Paris to sift the material and figures gathered and then make their decisions and reports.

It is believed that the Dawes committee will find that there can be no reparations without the return of the Rhine and Ruhr to the German economic unity; that a moratorium of two or three years will be necessary for Germany, even if the Rhine and Ruhr are returned, and that the final fixation of the ultimate reparations figure must be made later, after Germany's economic life has been restored, possibly three years hence.

The McKenna committee will estimate the approximate total of German capital held abroad. This total, however, still depends on the summary of the figures obtained.

Fall's Action Upheld.

Washington, Feb. 6.—Albert B. Fall's action while secretary of the interior in canceling a land grant to the Santa Fe-Pacific Railroad company was upheld here by the district court of appeals, which affirmed a decision of the supreme court of the District of Columbia. The railroad in 1886 was granted non-mineral public lands, with the right to relinquish such parts as were settled upon and to receive other land. It relinquished certain land in 1921 and selected in its place coal lands, but the court ruled its choice was limited to agricultural tracts, sustaining Mr. Fall's action.

REPUBLICANS HIT BACK

Reply to Statement Made by Chairman of Democratic Committee.

Washington, Feb. 6.—The Republican national committee replied to the statement of Chairman Hull of the Democratic national committee in which the latter criticized officials of the Republican administration for their part in the oil lease scandal. The Republican organization points to the testimony of Edward L. Doheny, which revealed that William Gibbs McAdoo, Thomas W. Gregory and George Creel, allied with the last Democratic administration, were on the Doheny payroll. The statement added:

"The sworn testimony before the committee is shot through and through and through with proof that the administration of oil lands under eight years of the Democratic administration affords a fertile field for investigation. The evidence piles up that throughout this period the department of the interior coddled up to the private oil interests of the country, and the department of justice, under A. Mitchell Palmer, was tender with them. President Coolidge is well within the facts when he states 'men are involved who belong to both political parties.'"

MARKET QUOTATIONS

CHICAGO, Feb. 6.

Cattle—Top steers, \$11; bulk of sales, \$7 75; stockers and feeders, \$5 25; calves, \$10 50; hogs—Top, \$7 35; bulk of sales, \$7 25; packing hogs, \$6 40; pigs, \$5 50; sheep and lambs—Native spring lambs, \$13 50; hogs, \$6 00; receipts—Cattle, 8,000; hogs, 40,000; sheep and lambs, 8,000.

CLEVELAND, Feb. 6.

Cattle—Steers, \$4 50; hogs, \$4 50; calves, \$7 75; stockers, \$5 25; cows, \$4 50; hogs—Top, \$7 35; bulk of sales, \$7 25; packing hogs, \$6 40; pigs, \$5 50; sheep and lambs—Native spring lambs, \$13 50; hogs, \$6 00; receipts—Cattle, 300; hogs, 2,000; sheep and lambs, 500.

PITTSBURGH, Feb. 6.

Cattle—Steers, \$9 75; hogs, \$7 50; calves, \$7 50; stockers, \$5 50; cows, \$5 50; hogs—Top, \$7 35; bulk of sales, \$7 25; packing hogs, \$6 40; pigs, \$5 50; sheep and lambs—Native spring lambs, \$13 50; hogs, \$6 00; receipts—Cattle, 300; hogs, 2,000; sheep and lambs, 500.

CINCINNATI, Feb. 6.

Hitler was a bachelor and relatives attacked the will because he made a large bequest to the centralized school of that county, alleging "eccentricities."

Youth to Die in Chair.

Akron, O., Feb. 6.—Alexander Kusczik, 19, was condemned to death by a jury which returned a verdict of guilty of first degree murder against him, without a recommendation of mercy. Kusczik beat Elizabeth Nagy, his 13-year-old cousin, to death with a hammer Nov. 6, in her home, during her parents' absence.

To Run One-Man Cars.

Springfield, O., Feb. 6.—One-man streetcars will be placed in operation in this city within the near future. Plans of the street railway company meet the approval of the city commission. The car company declares that under present operating methods, it is unable to keep up with its obligations.

Falls From Viaduct.

Columbus, Feb. 6.—Without regaining consciousness, Louis Christian Weber, 71, local dry goods merchant, died in St. Francis hospital from internal injuries sustained when he is thought to have fallen from a viaduct.

"Flapper" Bandit Pleads Guilty.

Cleveland, Feb. 6.—Mrs. Anna Kerns, 21, the "flapper" bandit, pleaded guilty before Common Pleas Judge McMahon to a charge of robbing the Benfield Drug company of \$38 on Jan. 24. Sentence was deferred.

Boulay Favors Gasoline Tax.

Springfield, O., Feb. 6.—A tax on gasoline as a means of raising funds for road work in Ohio was advocated by State Highway Director L. A. Boulay in an address before the Springfield Kiwanis club.

Gunshot Wounds May Prove Fatal.

Lima, O., Feb. 6.—Rolf Lee, 28, is in a serious condition from gunshot wounds received, it is charged, when he attempted to rob a filling station manned by John Dawson here.

Centenarian Dead.

Cincinnati, Feb. 6.—Luther H. Marsh, 100 years and 8 days old, whose parents came to Cincinnati by wagon from New Jersey, died at his home here.

Order Hits German Flappers.

Berlin, Feb. 6.—The German flapper has been barred from the offices of the Prussian finance minister. The finance department has issued an order forbidding "female employees to wear, during office hours, dresses which leave uncovered, or covered only with transparent materials, parts of the chest or back." Offenders are threatened with dismissal. The order does not state any objections to short skirts or silk stockings.

TO HOLD PARLEY AT CAPITAL

Political Advisers of McAdoo to Discuss Situation.

MAY MEET ON THURSDAY

Gathering, It Is Said, Will Determine Whether the Former Secretary of Treasury Shall Remain in Race For the Democratic Presidential Nomination—Sequel of Disclosures in Oil Lease Probe.

Washington, Feb. 6.—Political friends and advisers of William Gibbs McAdoo are gathering here for a conference to determine whether the former secretary of the treasury shall remain in the race for the Democratic presidential nomination.

The conference, it was learned, will take place probably on Thursday. His advisers will take stock of the situation precipitated by the disclosures last Friday before the oil lease investigating committee. The testimony of Edward L. Doheny was to the effect that he had paid McAdoo \$250,000 for his services as counsel after he left the Wilson cabinet.

Daniel R. Roper, former internal revenue commissioner under McAdoo, who has been in charge of his Washington headquarters, admitted that he and other friends would discuss the situation with McAdoo.

Did Woodrow Wilson frown upon McAdoo's legal connection with the Doheny oil interests? is a question being asked here in political circles as the oil reserve case resumes first place in public interest following the death of the former president.

By many observers it is asserted there are grounds for believing Mr. Wilson disapproved of his son-in-law's action, particularly after the consummation of leases turning over the California reserves to the multimillionaire operator. Mr. McAdoo, they say, was very close to Mr. Wilson up to the time he was retained by Doheny, shortly after he resigned as secretary of the treasury in 1913. His visits to the white house, however, became rare after this event, and since Mr. Wilson entered private life, three years ago, he was but an occasional guest at the S street home, though he did dine there on his last two visits to Washington the latter half of last year. Strangest of all, Mr. Wilson never signified approval by word or sign of McAdoo's potential presidential candidacy on the Democratic ticket, it is said.

WANTS THE FACTS

Norris Would Probe Report That Certain Senators Bought Oil Stock.

Washington, Feb. 6.—Senator Norris, leader among the Republican progressives of the upper house, issued the following statement:

"I am informed there is a report current that a number of senators and other high government officials in Washington bought Sinclair Consolidated oil stock before the announcement of the lease by Secretary of the Interior Fall to Sinclair of Teapot Dome and then sold that stock after the announcement of the lease when the market had risen. In my judgment the committee ought to go to the very bottom of the entire matter and permit no avenue of escape for anybody, regardless of the position he may hold. I think the facts could be very readily ascertained if the committee would issue a subpoena, returnable forthwith, directing the proper officer of the New York stock exchange to appear before the committee with the books that would show all the stock dealings from Washington covering the time specified."

LIONESS BEHEADS MAN

Beasts Get Out of Hand During Filming of Play "Quo Vadis."

Rome, Feb. 6.—While a set in the play "Quo Vadis" was being filmed, depicting the combat of the Christians with the wild beasts, in which 20 lions and several tigers are employed, a lioness suddenly jumped among the 50 actors who were enacting the part of Christians. The lioness lifted a man with her jaws, inflicting 12 wounds, finally biting off his head. A desperate encounter followed, the beasts getting out of hand. The lioness was afterward slain, while several actors were injured and trampled upon during the panic.

Auto Accident Fatal.

Cincinnati, Feb. 6.—Mrs. Helen Dwyer, 70, of Buckner, died of a heart attack following an automobile accident near New Richmond.

EXPERTS TO REPORT SOON

Investigation of Germany's Capacity to Pay Drawing to a Close.

Berlin, Feb. 6.—The investigation by the reparations commission's committee of experts of Germany's capacity to pay is drawing to a close. The committee headed by Reginald McKenna, which is probing the flight of German capital to foreign countries, expects to leave Berlin Friday. The committee headed by General Charles G. Dawes, which is delving into German economic conditions, expects to follow Saturday. Both committees will reassemble in Paris to sift the material and figures gathered and then make their decisions and reports.

It is believed that the Dawes committee will find that there can be no reparations without the return of the Rhine and Ruhr to the German economic unity; that a moratorium of two or three years will be necessary for Germany, even if the Rhine and Ruhr are returned, and that the final fixation of the ultimate reparations figure must be made later, after Germany's economic life has been restored, possibly three years hence.

The McKenna committee will estimate the approximate total of German capital held abroad. This total, however, still depends on the summary of the figures obtained.

Fall's Action Upheld.

Washington, Feb. 6.—Albert B. Fall's action while secretary of the interior in canceling a land grant to the Santa Fe-Pacific Railroad company was upheld here by the district court of appeals, which affirmed a decision of the supreme court of the District of Columbia. The railroad in 1885 was granted non-mineral public lands, with the right to relinquish such parts as were settled upon and to receive other land. It relinquished certain land in 1921 and selected in its place coal lands, but the court ruled its choice was limited to agricultural tracts, sustaining Mr. Fall's action.

REPUBLICANS HIT BACK

Reply to Statement Made by Chairman of Democratic Committee.

Washington, Feb. 6.—The Republican national committee replied to the statement of Chairman Hull of the Democratic national committee in which the latter criticized officials of the Republican administration for their part in the oil lease scandal. The Republican organization points to the testimony of Edward L. Doheny, which revealed that William Gibbs McAdoo, Thomas W. Gregory and George Creel, allied with the last Democratic administration, were on the Doheny payroll. The statement added:

"The sworn testimony before the committee is shot through and through and through with proof that the administration of oil lands under eight years of the Democratic administration affords a fertile field for investigation. The evidence piles up that throughout this period the department of the interior coddled up to the private oil interests of the country, and the department of justice, under A. Mitchell Palmer, was tender with them. President Coolidge is well within the facts when he states 'men are involved who belong to both political parties.'"

MARKET QUOTATIONS

CHICAGO, Feb. 6.

Cattle—Top steers, \$11; bulk of sales, \$8 75; stockers and feeders, \$5 25; calves, \$10 50; \$11 50.

Making and Storing Ice for Summer Use

Method of Freezing in Cans or Paper Bags Outlined.

(Prepared by the United States Department of Agriculture.)
Furnishing the average farm with a sufficient supply of ice for use in the house and the dairy is a problem of considerable concern in many localities, especially where there are no ponds or streams from which a natural supply can be secured. A method of freezing ice in metal cans or special paper bags may be used, says the United States Department of Agriculture, in regions where cold weather prevails for several weeks at a time and where the supply of pure water is limited.

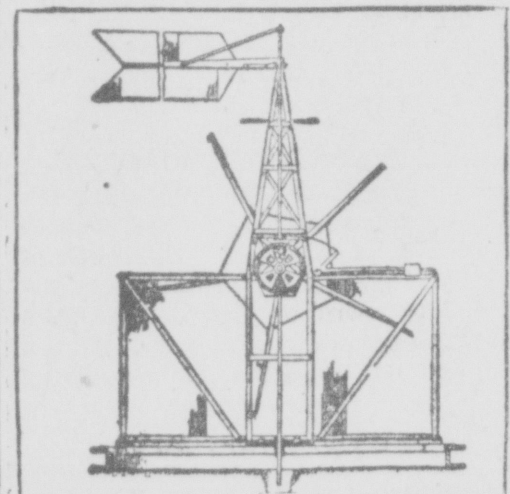

The cans may be made in any convenient size by a local tinsmith and should be of galvanized iron reinforced at top and bottom with iron strips. The bottom is made slightly smaller than the top to make the removal of the ice easier. The cans are placed near the well or other source of water supply, filled with water and left exposed to the weather. A shell of ice soon freezes around the inner surface, and when this shell is from 1½ to 2 inches thick, hot water is poured over the outside of the can and the shell removed. If left to freeze solid the cake would tend to burst or bulge. After the shell is removed from the can a hole is broken through at the top of the shell and most of the water inside then poured out. As the freezing progresses, water is poured into the shell a little at a time until a solid block of ice is produced. By this method only a few cans are required, usually enough to complete the freezing of one or two layers for the ice house at a time.

About the same method is employed when special paper bags are used, although they do not last so long as the cans. Another method that can be used in very cold sections of the United States is to run water into the ice house and let a layer freeze. This is done by first constructing a dam of snow around the floor of the house 10 or 12 inches from the wall in order to allow sawdust insulation next to the walls. The interior of the house is then flooded with a few inches of water, which soon freezes, the procedure being repeated until the house is filled with ice. It is then covered with sawdust and closed up until ice is needed. A great disadvantage of this method is that in order to remove ice, it must be cut or chopped out with an ax, which results in uneven and irregular pieces and considerable waste of ice.

New Invention Provides Adjustment on Windmill

The Scientific American in illustrating and describing an attachment for a windmill, the invention of L. F. Williams, Muleshoe, Texas, says:

The invention especially relates to windmills adapted for use in operating wells. An important object is to provide a windmill having means whereby the same is positioned with relation to the wind and whereby the same may be thrown out of gear during a storm or high wind. A further object is to provide a windmill having a pair of wooden or metal wheels which by a novel arrangement are operatively connected to a pitman rod or drive shaft.

Windmill Provided With Means for Self-Adjustment to the Wind.

vide a windmill having means whereby the same is positioned with relation to the wind and whereby the same may be thrown out of gear during a storm or high wind. A further object is to provide a windmill having a pair of wooden or metal wheels which by a novel arrangement are operatively connected to a pitman rod or drive shaft.

Sweet Soil Is Necessary for Many Garden Crops

Your garden may not be acid, but if it has been kept pretty rich the chances are it is. When manure and green crops are plowed under they decay and make for acidity, and no soil is at its best for most crops when in this condition. Some crops do not object so much as others, but for a general high-producing soil it is necessary to keep it sweet. There is little danger of getting it too full of lime, and as lime will help to make all fertilizers produce better results, when using them it is advisable to first lime the soil. Lime and fertilizers should not be applied together, for the lime will often cause a loss of plant food by hasty chemical action.

Skim Milk Valuable for Feeding Young Animals

Skim milk is worth very much more for feeding to pigs and calves than to dairy cows, but when a surplus is at hand it is all right to use it. At the Connecticut station, when separator skim milk was offered to the old cows, only four would drink it, even though water was withheld for forty-eight hours and grain was mixed with the milk. With the four cows, skim milk was substituted for concentrates in the ration at the rate of eight pounds of milk for one of concentrates. This substitution caused an increase in the yield of milk.

Find Statue 5,000 Years Old

A royal statue 5,000 years old is one of the many rare relics unearthed by excavations recently made on the site of Ur in Mesopotamia, the home town of Abraham's ancestors. The statue was dug up in the ruins of a temple dedicated to the moon god, whose worship was observed there for probably 4,000 years. It is a figure of Entemena, king of Lagash, who lived about 2900 B. C. What he looked like is impossible to discover as the head of the statue is missing. Records show the temple to have been rebuilt in 2300 B. C., after many centuries of use. It was remodeled by Nebuchadnezzar and again by Cyrus the Great in the fifth century B. C. This was probably the last alteration as less than a century later the Persian fire-worshippers destroyed all the temples and images of the ancient idolatrous religion.

Mother's Mistake

"You look worried, old man," said Charles. "What's the matter?"

"I called on Miss Graham last night," returned Claude, "and no sooner had I entered the house than her mother appeared and demanded to know my intentions."

"That situation must have been rather embarrassing."

"Yes, but that wasn't the worst. Just as the old lady finished speaking, Miss Graham shouted down the stairs:

"Mother, that isn't the one!"

Most Effective

"I suppose, Henry," said the old gentleman to his new son-in-law, "that you are aware the check for fifty thousand dollars I put among your wedding presents was merely for effect."

"Oh, yes, sir," responded the cheerful Henry, "and the effect was excellent. The bank cashed it this morning without a word."—Vanity Fair.

Too Late

Old Gentleman (engaging a new chauffeur)—I suppose I can write to your last employer for your character?

Chauffeur—I'm sorry to say, sir, each of the last two gentlemen I have been with died in my service.—Punch (London).

Final Clean-Up of All Winter Apparel

Our first orders for Spring merchandise have been placed and are expected to arrive within the next two weeks, which means a thorough clean-sweep must take place of all remaining Winter styles. This is just what is going to happen here beginning tomorrow morning. Still lower price tickets have been placed on fashionable ready-to-wear for no reason other than to make room for Spring's first arrivals. The character of the merchandise and the savings to be effected are such that one who is in need of something new and distinctive in apparel cannot with justice to themselves pass up this great opportunity.

Fur Trimmed COATS Of Bolivia \$36.45

From advanced Spring fashion reports these coats are to be much in vogue. So to purchase now at a sale price is to save money and possess a coat that will be in the height of the mode in the Spring of the year. These coats are of the best Bolivia materials, with collars of excellent quality fur and lined with the best material. Coats that were made to sell as high as \$99.75. Final Clean-Up

\$36.45

CLEAN-UP of DRESSES \$13.95

Woman who took advantage of previous sales of these dresses will welcome this opportunity to make further selections. We have gone through our stock of dresses and selected these for a special selling. All are advanced Spring models made up in fabrics that will be most popular.

STYLISH SUITS

In Final Clean-Up Priced at

\$26.95

Just 49 Suits which we have selected for a final clean-up and which we have repriced at a figure lower than suits of equal worth will be offered again.

Cloth COATS With Fur Trimming In a Wide Variety of Styles at \$14.45

While emphasis is placed upon the extreme lowness of the price, you will notice upon investigation that these coats belong in the higher price class. As a matter of fact these coats were much higher priced, but they must take lower prices regardless of their real worth to insure a quick disposal. Velours of good quality which we guarantee to give long service of style and warmth. All fully lined and most of them with fur collars and cuffs.

SILK DRESSES A Choice Collection at \$18.95

You're going to wonder when you see these dresses, just how such new styles at the very threshold of their popularity can be possibly purchased at these prices. If they were bought in the regular channels they could not. This group represents a special purchase in which we share our price discount with you, with the result your money will buy more dress value than you would ordinarily expect.

A further object is to provide a windmill having a pair of wooden or metal wheels which by a novel arrangement are operatively connected to a pitman rod or drive shaft.

Windmill Provided With Means for Self-Adjustment to the Wind.

vide a windmill having means whereby the same is positioned with relation to the wind and whereby the same may be thrown out of gear during a storm or high wind. A further object is to provide a windmill having a pair of wooden or metal wheels which by a novel arrangement are operatively connected to a pitman rod or drive shaft.

Sweet Soil Is Necessary for Many Garden Crops

Your garden may not be acid, but it has been kept pretty rich the chances are it is. When manure and green crops are plowed under they decay and make for acidity, and no soil is at its best for most crops when in this condition. Some crops do not object so much as others, but for a general high-producing soil it is necessary to keep it sweet. There is little danger of getting it too full of lime, and as lime will help to make all fertilizers produce better results, when using them it is advisable to first lime the soil. Lime and fertilizers should not be applied together, for the lime will often cause a loss of plant food by hasty chemical action.

Skim Milk Valuable for Feeding Young Animals

Skim milk is worth very much more for feeding to pigs and calves than to dairy cows, but when a surplus is at hand it is all right to use it. At the Connecticut station, when separator skim milk was offered to the old cows, only four would drink it, even though water was withheld for forty-eight hours and grain was mixed with the milk. With the four cows, skim milk was substituted for concentrates in the ration at the rate of eight pounds of milk for one of concentrates. This substitution caused an increase in the yield of milk.

Find Statue 5,000 Years Old

A royal statue 5,000 years old is one of the many rare relics unearthed by excavations recently made on the site of Ur in Mesopotamia, the home town of Abraham's ancestors. The statue was dug up in the ruins of a temple dedicated to the moon god, whose worship was observed there for probably 4,000 years. It is a figure of Entemena, king of Lagash, who lived about 2900 B. C. What he looked like is impossible to discover as the head of the statue is missing. Records show the temple to have been rebuilt in 2300 B. C., after many centuries of use. It was remodeled by Nebuchadnezzar and again by Cyrus the Great in the fifth century B. C. This was probably the last alteration as less than a century later the Persian fire-worshippers destroyed all the temples and images of the ancient idolatrous religion.

Mother's Mistake

"You look worried, old man," said Charles. "What's the matter?" "I called on Miss Graham last night," returned Claude, "and no sooner had I entered the house than her mother appeared and demanded to know my intentions." "That situation must have been rather embarrassing." "Yes, but that wasn't the worst. Just as the old lady finished speaking, Miss Graham shouted down the stairs: "Mother, that isn't the one!"

Most Effective

"I suppose, Henry," said the old gentleman to his new son-in-law, "that you are aware the check for fifty thousand dollars I put among your wedding presents was merely for effect." "Oh, yes, sir," responded the cheerful Henry, "and the effect was excellent. The bank cashed it this morning without a word."—Vanity Fair.

Too Late

Old Gentleman (engaging a new chauffeur)—I suppose I can write to your last employer for your character? Chauffeur—I'm sorry to say, sir, each of the last two gentlemen I have been with died in my service.—Punch (London).

Final Clean-Up of All Winter Apparel

Our first orders for Spring merchandise have been placed and are expected to arrive within the next two weeks, which means a thorough clean-sweep must take place of all remaining Winter styles. This is just what is going to happen here beginning tomorrow morning. Still lower price tickets have been placed on fashionable ready-to-wear for no reason other than to make room for Spring's first arrivals. The character of the merchandise and the savings to be effected are such that one who is in need of something new and distinctive in apparel cannot with justice to themselves pass up this great opportunity.

Fur Trimmed
COATS
Of Bolivia
\$36.45

From advanced Spring fashion reports these coats are to be much in vogue. So to purchase now at a sale price is to save money and possess a coat that will be in the height of the mode in the Spring of the year. These coats are of the best Bolivia materials, with collars of excellent quality fur and lined with the best material. Coats that were made to sell as high as \$99.75. Final Clean-Up

\$36.45

CLEAN-UP
of
DRESSES
\$13.95

Woman who took advantage of previous sales of these dresses will welcome this opportunity to make further selections. We have gone through our stock of dresses and selected these for a special selling. All are advanced Spring models made up in fabrics that will be most popular.

STYLISH
SUITS

In Final Clean-Up Priced at

\$26.95

Just 49 Suits which we have selected for a final clean-up and which we have repriced at a figure lower than suits of equal worth will be offered again.

Cloth
COATS
With Fur Trimming
In a Wide Variety of
Styles at
\$14.45

While emphasis is placed upon the extreme lowness of the price, you will notice upon investigation that these coats belong in the higher price class. As a matter of fact these coats were much higher priced, but they must take lower prices regardless of their real worth to insure a quick disposal. Velours of good quality which we guarantee to give long service of style and warmth. All fully lined and most of them with fur collars and cuffs.

SILK DRESSES
A Choice Collection
at
\$18.95

You're going to wonder when you see these dresses, just how such new styles at the very threshold of their popularity can be possibly purchased at these prices. If they were bought in the regular channels they could not. This group represents a special purchase in which we share our price discount with you, with the result your money will buy more dress value than you would ordinarily expect.

Tea Gowns Are of Distinctive Styles

Many Models in New Type of Garment; Made of Dainty Chiffon.

When women live the hurried life of the present, rushing from one engagement to another, many different sorts of dress are required. So much of fashionable life is spent in public that the designers, especially those of the older authority and regime, have a problem before them in dressing the woman who wishes to lead. Yet, observes a fashion correspondent in the New York Times, the fever that sends the restless younger set and the swagger set into the open and under the night lights seems somewhat to have spent itself. There is coming to be more relaxation and a greater number of occasions of ease in which beautiful dress is a joy and a comfort. The stiff and handsome brocades—metal and silk and splendidly oriental—have become the materials for dinner and dance and other formal occasions. The dream-cloud fabrics—the chiffons and tulle and gauzes—come into their own for gowns now intine.

The salon, even its American expression, affords to a hostess the most inviting opportunity to wear one of the artistic creations in which every modiste delights. There is the proper place for an intine costume done in the most attractive manner possible and expressing a formality and grace that is established on no other occasion. A feeling for this phase of dress is expressed by the best artists, some of whom find their metier to be in creating the softer and more subtle type of gown.

Anticipating the increased demand among women of fashion for the tea gowns of distinctive style, the couturieres of Paris have sent some models that are offered and copied in many delightful versions. This new type is more soft and lovely and subtle than anything in gowns that has been seen.

It is all of chiffon—delicate, dainty and sweetly beautiful. The models are many, and all of them are engaging. One, a Dresden china composition, has a foundation of novelty lace in soft ecru. This drops rather straight over the slip of pale yellow, which is of a somewhat deeper shade than "corn." Then, as the long draperies are arranged from neck to hem, they trail softly several inches on the floor.

The outer garment is a sleeveless coat of beige chiffon, with bands of beige-tinted lace bordering each side of the front. Coats of different shades are provided to wear over this foundation, graduating from deep to lighter yellow and to cream. One of the "coats" is trimmed with sable across the neck at the back and extending to the hem at each side and around the bottom.

Gown in Black and White.

A formal tea gown that most sumptuously fills the picture is expressed in striking black and white and is made of the richest material. Upon the essential slip of soft white satin, which serves as a foundation, is built the gown. Two panels of white chiffon brocade form the front and back. These are caught in at the belt line on each side to form a semi-fitting garment.

A slip-on coat is of black Spanish lace, falling in a short train at the

Chinese Coat of Old Blue Velvet Over Plaited Skirt of Salmon Pink.

back and slipper length in front. The white foundation is cut decollete, the lace being high at the back and open in the front, and the lace edges the overgarment to the bottom. Sleeves are formed with widths of black chiffon sewn into the lace at the arms and falling straight to the hem of the gown. A collar of black fox fur finishes the lace at the back of the neck.

One model, charming, modish and contrasting strikingly with the black-and-white tea gown, is all neutral in its color scheme. It is one of these soft, half-clinging, half-floating types of gown that are always spoken of as "distinctively feminine." Poetic, il-lusive and lovely they certainly are. This one is evolved from a symphony of beige and corn colored and cafe au lait chiffon. Its foundation is cut to form a short, pointed train. A coat of chiffon extends to the hem of the gown.

One of the most enchanting of these

robes has a coat of pale blue chiffon, pointed here and there with a petite nosegay of French flowers—a rosebud and a sprig of forget-me-nots, with a touch of green. The coat's eyes are long, angel affairs, straight widths from the shoulders, falling over the arms, which they cover with charming becomingness to the wrist.

Like a beautiful fuchsia is a tea gown that is made after the usual lines and of chiffon in all the colors of the exotic flower. Purple, magenta and orchid are draped and blended, and the rose tint of a satin slip glows faintly through.

Charming New French Robe.

Elaborate and regal is a new French robe d'interieur. Its foundation is of white satin. Over this is worn a tunic, pointed to the toe in front and trailing in the back, of black and gold brocade-chiffon in large design. Black chiffon forms a drapery and sleeves falling from the line of the neck at the back and from the arm at the sides in square lengths to the floor.

Orchid-like is an entrancing robe, one of the most artistic shown this season, in flower shades of chiffon over satin in the palest pink. In one shop

Soft Green Chiffon Velvet, Gold Cloth and Sable Combine Beautifully.

that features tea gowns and lovely things for home wear is a model in hy-drangea-blue gauze, veiling pale rose, and these over silk of a rose shade still more faint. A narrow collar of sable at the back fastens a cape of exquisite cream-colored lace, which falls to the waistline over the sheer material that floats softly into a train.

With the renewed popularity of the formal tea gown, individual taste is expressed in some truly gorgeous affairs. Conventionally, the gown should be something soft and graceful and as dainty as thistle-down. But the greatest license is evident in the designs offered by some artists of prominence, and obviously these designs appeal to some of their patrons.

A model sent by one of the best known couturieres of Paris might easily be worn for a ball gown. It is of chiffon velvet in a shade known as old blue, made entrain straight from the neck, banded with sable, and opening over a princess slip of rich Chinese embroidery, done in many colors on white satin.

Another of these regal "gowns" is made of metal brocade, silver and blue, in a straight tube-like princess dress, with the popular "coat" very long at the back, and cut to the bottom of the gown in front. This has angel sleeves and is cut wide. The narrow brown fur with which the coat is finished all around makes a gown of much distinction.

For those who prefer the heavier, richer materials, metal brocades, velvet or fur, there are many splendid models. But the feeling of most women is for the more flattering weaves. These may be made as costly as one desires, especially in the introduction of rare lace and embroidery and in the use of that most delicious of the new fabrics, chiffon velvet brocade, which may be had in all the delicate colors.

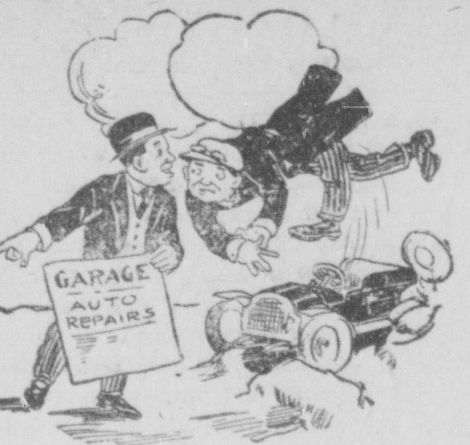

Demand for Fancy Articles.

The fad for trimming, elaborating, ornamenting everything possible, has established a market for a great variety of fancy articles. These departments in the dress shops have grown amazingly in past months, and a lively imagination is needed to keep pace with the novel ideas. In long, brightly lighted cases are pretty flowers, figures, sprays, tiny wreaths and trailing garlands, made of ribbon in delicate colors and tinsel; butterflies, birds—bluebirds, humming birds, even parrots and birds of paradise, all to be sewn on lingerie.

Trimming by the yard is of any and every sort. Among the newest fancies are the Russian, Czechoslovak and Swedish embroideries in the gayer colors and sturdier designs. The Egyptian designs in colored silks and beads are made in motifs and hand trimming to be used in lieu of much more expensive needlework on blouses, gowns, wraps, on bags and many other small accessories.

Fringe, wide or narrow, silk, metal, chenille or bead, is shown in the piece, and is seen on some of the exclusive French models of gowns and wraps, especially negligees and tea gowns. After the universal rage of fringe two seasons ago it was quite "out." Then the craze for Spanish shawls brought a reminder of its siren gracefulness, and now some of the latest gowns from Paris shimmer with the silken lines of fringe from shoulder to hem.

ALASKA WILL GROW
OWN FARM PRODUCEU. S. to Make Region Yield
Fresh Vegetables, Etc.

Washington, D. C.—Gold, forests, fish and fur for long years were Alaska's only real important assets, but now we read in reports of the several agricultural experiment stations that real progress is being made in developing the agricultural resources of our farthest north possession. It is not the hope of the United States Department of Agriculture to make the soil of this region produce in great abundance, but there is good reason to believe that much of the food being shipped in can be grown there and that better supplies of fresh vegetables, fruit, and milk can be provided. The government and settlers are growing cattle, sheep and goats. After some trials with different breeds hogs are being bred and raised successfully. Attempts are being made to cross the yak and common cattle just as has been done in central Asia for many years. The hardy, rustling, heavy-haired Galloways have been found admirably suited to the southwestern part of the territory, and this breed with the Holstein-Friesian is being used to produce reciprocal crosses which, it is hoped, will result in a hardy dairy type.

Hardy Grains Do Well.

Especially hardy strains of grains do well in the interior during most seasons, according to the report, and when the summer is wet or frosts come too soon the crops can be made into hay or silage. Tests are being made of promising varieties of spring wheat, and some work is being done with winter wheat, although there is little reason to believe that this type can equal spring wheat. Barley is the most promising stock grain as it matures much earlier than either spring wheat or oats, the latter being used almost entirely for hay. Hybridization experiments are being made on all these grains in an effort to develop higher-yielding and hardier varieties.

It is predicted that legumes are destined to play an important role in Alaskan agriculture as they are useful for hay and pasture and for soil improvement. Most of the alfalfas lack sufficient hardiness for this climate, even some of the Siberian varieties and Grimm, but a yellow-flowered kind, Medicago falcata, sent from the department experimental fields in 1909, has survived the hard winters. Next in importance is a perennial vetch. The common clovers have been tried and found wanting, but red clover is of value as an annual crop sown early in May and cut for hay or plowed under late in August. Early-maturing field peas promise to be an important crop in the interior. Sweet clover has failed.

Silo Solves Winter Feeding.

Winter feed is a big problem for Alaska farmers, but the silo is helping them solve it. Oats with peas or vetch makes good silage, as do also some of the native grasses, especially wild rye and a tall sedge. Among the tame grasses smooth brome grass is the best.

The garden helps greatly in making life enjoyable, for many of the common vegetables are now grown successfully in all parts of the territory south of "the circle." "Alaska produces as fine potatoes as can be found in any country," says the report, and they are successfully grown in all parts of the territory, even far north of the Arctic circle, in favorable seasons.

Improved hardy varieties have been developed and are being grown. Hardy hybrid strawberries of good quality produced by the experiment stations are now widely grown in some sections as a commercial crop. Currants, gooseberries, and raspberries are other fruits which may be successfully grown. Alaska has scarcely any native ornamental shrubs and efforts are being made to find suitable ones of sufficient hardiness. The best one tried so far is Rosa rugosa, the Japanese rose, which seems to be hardy in all parts of the region.

Old Mural Paintings

Discovered in Palace

Warsaw.—During the restoration of the Warsaw royal palace, dating from 1602, beautiful mural paintings of the Eighteenth century have been discovered hidden beneath papers and tapestries put on the walls during the Russian occupation of Warsaw. The paintings are of the Italian school and of great artistic value. Every endeavor is being made to restore them completely. No clue yet has been found as to the identity of the painter.

Honeymoon Halted

When Car Is Stolen

Washington.—A newly married couple abandoned their honeymoon because their automobile had been stolen. The disappointed bride and bridegroom are Mr. and Mrs. Forrest Haddon. The bride until a few days ago was Miss Mildred Reynolds of Petersburg, Va. They motored here with their friend, J. Spivney. The party went to a motion picture theater, leaving their car parked nearby. It was gone when they looked for it. A laprobe, valued at \$75, and a wedding present were in the car when it was stolen.

MRS. J. W. PONTIUS

Died at Her Home on Watt Street—
Funeral and Burial Friday.

Mrs. Elizabeth Ann Pontius, wife of Jonathan Pontius died at her home, 345 Watt street, Tuesday morning, at 7:45 o'clock. She had been ill two months. The deceased was the daughter of Greenbury and Amanda Lee Roby. She was born in this city, February 15, 1845. February 20, 1867 she was married to Jonathan W. Pontius, a second lieutenant in Company C, 18th O. V. I.

Her husband, one son and three daughters survive. They are Howard Pontius of Columbus; Mrs. Ida Circle of Sidney, Indiana; Mrs. Della Fritz, of Jamestown, Ohio and Mrs. Cora Coffland, of this city. Eight grandchildren and five great-grandchildren are living. Mrs. Pontius was a member of the United Brethren church.

The funeral services which will be private will be held at her late home Friday afternoon, February 8, at 2:30 o'clock. Rev. S. W. Hiles will be the officiating minister. The pallbearers will be Paul Frenk, Leroy Coffland, Ellsworth Coffland, Carl Pontius, Howard Pontius and Olan Bostwick. Interment in Forest cemetery.

* SOCIAL CALENDAR *

The Business and Professional Women's club was well entertained at its meeting Monday evening by Professor M. C. Warren, who gave a very interesting and instructive talk on the subject: "Democracy," which was very much appreciated and enjoyed by all.

EDWIN J. LIGHT DEAD.

Edwin J. Light died at his home in Washington C. H. Tuesday evening. He was a son of Jacob and Phoebe Light, of Frankfort, Ross county. He accompanied his parents to Washington C. H. when he was a mere boy, attended high school and afterwards was elected to the office of clerk of courts, serving two terms.

Mr. Light after retiring from office entered the insurance business and became a most successful agent. He passed thru all the chairs in the F. & A. M. lodge, including that of worshipful master in 1892, thrice illustrious master in 1911 and commander of the Knights Templar in 1905. The deceased was a member of the Grace Methodist Episcopal church.

Funeral services will be held Thursday afternoon at 2 o'clock.

MONDAY CLUB.

The Monday club at its meeting this week made a study of Italy and the program was as follows:

EYES OF INSECTS
USED FOR LENSESMany Marvels Are Revealed
at Meeting of Scientists.

A 110 candlepower incandescent lamp was lighted by power transmitted by radio at a meeting of the American Association for the Advancement of Science at Cincinnati recently, presided over by W. R. Whitney of the General Electric company.

An endless variety of subjects of scientific interest were presented. These included photography in which the lenses were eyes of insects; dissection of a microscopic cell by a glass needle of infinite fineness; a report on a female dove which was transformed into a male by natural causes without any kind of interference by science, and the presentation of evidence that human beings had religious ideas, roughly 100,000 years ago, and buried their dead carefully in the hope of helping them in future life.

Insect Eye Photography.

Water beetles, whose eyes each have about 4,000 lenses, are the best for insect eye photography, according to W. F. Watson, who demonstrated this new method of research. The 4,000 lenses occupy an area less than that of a pinhead, and only about one-tenth of this area is actually used in camera work. The picture is taken through about 400 lenses and then enlarged by a microscope and thrown on the photographic plate by an ordinary camera lens.

Each of the 400 lenses makes a separate picture, so that the plates, 5 inches by 7, are covered by 400 miniature pictures of the thing photographed.

Pictures of Clemenceau, Pasteur, Edgar Allan Poe and others, and pictures of various insects, had been photographed in this way. Each face was reproduced 400 times in regular rows, so that the developed photograph had a pattern like a sheet of postage stamps.

"The eyes of the common house fly are not so good for photography," said Dr. Watson. "I have used the eyes of hundreds of insects with varying success. The main purpose is not to take curious pictures, but to investigate the structure of the eyes. On this account, many biologists have been sending to me the lenses of the eyes of all kinds of insects. The whole procedure shows the marvelous perfection of these minute structures, of which 4,000 barely cover a pin head."

Bird Sex Change Spontaneous.

The change of the dove from female to male was described by Dr. Oscar Riddle of the Cold Spring Harbor experiment station. While such changes have been made artificially by the transplantation of tissue, this is said to be the first case on record where such a transformation occurred spontaneously.

The dove was a typical female and laid eggs for a time, then it stopped laying and increased in weight to nearly the size of a male dove. Its voice and habits changed to those of a male. It lived forty-four months after this change began. An autopsy showed that groups of cells had been destroyed by a tuberculous infection and had grown back or regenerated. Female cells had been destroyed and male cells regenerated.

"The scientific interest and importance of this can hardly be exaggerated," said Dr. Riddle, "since the result clearly indicates that no bodily or mental characteristic may be considered as irrevocably fixed and uncontrollable. It, therefore, becomes probable that all hereditary characteristics of every organism are capable of reversal and modification; and that the accomplishment of such modification and control is a matter which merely awaits the definitely directed efforts of investigators."

Alas Hrdlicka, who has just returned from a prolonged study of the remains of ancient man in Europe, said central Europe was undoubtedly "the cradle of the human race."

Tremendous populations of primitive men must have lived in various regions of Europe, and they can be traced back to the earliest known humans, he said, showing constant occupation of Europe by men from the first men to the present. The recent discovery of several varieties of ancient extinct apes in the same region indicated that it was here that humans emerged from some earlier stock bearing a family resemblance to the early ape stock.

Contradicts Old Theory.

Interest in Dr. Hrdlicka's paper was increased by the fact that it contradicted flatly the theory put forward by the American Museum of Natural History that central Asia was the cradle of the human race. The museum is sending an expedition there next year to prove it.

"The cradle of man," said Dr. Hrdlicka, "is not in some fabulous spot in central Asia where nobody has ever found anything."

Man is not the direct descendant of any ape or near ape, but from a distinct form having only a remote family resemblance to the ancestors of the gorilla and chimpanzee, according to Dr. Hrdlicka.

"Of course, if you go back far enough," said he, "you can find a common ancestor for them both. You can trace their ancestry back to the reptile, or if you go still further back, you can trace them both to a double ancestor."

Dr. Hrdlicka dated the emergence of distinct human beings from the ancestral brute at 400,000 or 500,000 years ago. The anthropologists of the American museum use a figure three or four times as great.

Religion 100,000 Years Ago.

Dr. Hrdlicka offered evidence that man for possibly 100,000 years had definite religious ideas and conceived of a future life. His evidence was based on recent studies of Neanderthal skeletons which indicated that the limbs had been carefully composed and the bodies buried after a fixed plan and with some kind of ceremonies.

"This can mean nothing but that a belief in a future life was already in existence," he said.

The theory of evolution held out the promise that man, who had advanced from such a low state, would go higher and higher, and that it was something like a sacrilege on that account to deny evolution.

A microscopic naval battle, with chemical warfare and other novelties, was described by William F. Kepner and John F. Baker of the University of Virginia. The minute combatants were the microstoma and the hydra.

With his eye on the microscope the observer can see the formidable hydra rush through the water, intending to use its "stinging threads" on the microstoma, an extremely simple organism of inoffensive appearance. Just as the threads are about to inflict their fatal sting the microstoma releases from its mouth a chemical which paralyzes the hydra. Science wins over brute force. The tiny microstoma slowly stuffs into its rudimentary stomach the body of the paralyzed hydra, but makes no attempt to swallow the deadly filaments.

"The stinging threads," say the authors, "lie about in an aimless manner. But eventually free moving cells of the microstoma's body carry these stinging threads over the surface of the microstoma."

The most remarkable fact is, however, that now the microstoma actually uses these threads that it has obtained from the hydra it has eaten to sting and locally paralyze other animals.

Plants Make Own Light.

Prof. Francis E. Lloyd of McGill university told of algae and other minute plants which took ordinary light and manufactured brilliant and vivid lights of their own. Under the microscope he showed specks of plant life which glowed like stained glass of vivid hues—deep red, orange, yellow and green. The light which entered the seemingly transparent cells was totally transformed. Its wave length was shortened and its color changed by the process known as fluorescence.

This is not a parlor trick, but a new method of reading secrets of life and growth of plants. The process of transforming light is closely connected with the production of the plant's food. When it is known how the plants produce new light, it will probably be known how they take carbon, their chief foodstuff, from the air. According to many scientists, the most important of all problems is to find out how plants capture carbon and to imitate it, so that man may control directly the apparatus of taking the all powerful energy of carbon from the atmosphere.

Landlord Faints When

Books Are Demanded

New York.—When Abraham Levy heard that the books of J. H. Levy & Sons, Inc., of 116 West One Hundred and Twelfth street, of which he is secretary and treasurer, were to be impounded by the city court and examined to find the extent of his profits on real estate transactions he fainted and was carried from the witness chair in city court. He was revived in an adjoining room.

Levy admitted he operated in purchasing apartment house leases on long terms and subletting at a profit.

Levy did not relish his cross-examination, and when it was over he withdrew his counter claim against the plaintiffs, Blauner Bros., who are suing for overdue rent, and accepted the judgment of the court against him for \$676.66.

Isidore Gainsburg, for the plaintiffs, refused to let the case drop, however, and asked Justice La Petra to have the books of the company impounded. At this point Levy toppled over.

New Device to Measure

Speed of Projectiles

A new instrument to measure the speed of a projectile as it passes through the barrel of a gun has been devised by the bureau of standards at Washington. The movement of a projectile through a gun barrel with its following charge of gas from burning powder, experts found, causes an infinitesimal expansion followed instantaneously by contraction. The minute ripple thus produced is recorded electrically by the new device, which is expected to be of great value in working out improvements in guns, projectiles and explosives.

250,000 Feet of Lumber
in Giant California Tree

A mammoth redwood, measuring 23 feet across the butt and 70 feet in circumference, was cut recently in the redwood forest near Crescent City, Cal., on the redwood highway. The tree was 300 feet tall. It will furnish 250,000 feet of lumber. It is pointed out that 50 cottages, each containing 5,000 feet of lumber, could be erected from the lumber cut from this single tree.

Fox Farming Growing Industry.

Although hardly known a decade ago, fox farming is a growing industry in this country, with 10,000 to 15,000 silver foxes being raised in captivity.

PUBLIC SALE.

The undersigned will offer for sale at the late residence of Cary Short, 8 miles southwest of Circleville, 3 miles west of Yellowbud, and five miles southeast of Williamsport, Ohio, on the Westfall road on

THURSDAY, FEBRUARY 7, 1924

commencing at 10 a. m. sharp, the following personal property:

50 HEAD OF HORSES, MULES AND PONIES

Consisting of 31 head of horses weighing from 1200 to 1800 pounds. Several good mated teams, 3-2 year old draft colts, 2 saddle horses, 9 head of ponies, 5 head of mules, 14 year old team will weigh 2700 pounds.

15 HEAD OF CATTLE

5 cows, 5 heifers, 5 calves.

100 HEAD OF HOGS

These hogs will weigh from 50 to 200 pounds.

FARM IMPLEMENTS, ETC.

One 1922 Hudson automobile, sport model, in good shape; about 30,000 brick, lot of lumber, windows, window frames, doors, galvanized roofing, slate roofing, harness, farming tools; household furniture consisting of 2 front room sets, 1 dresser, 4 chairs, 5 rocking chairs, 1 wardrobe, 1 stand, 1 wash stand, several large pictures and other articles too numerous to mention.

Terms made known on day of sale.

HARRY SHORT

Earl Swepston,
Guy Johnson
Emanuel Dresbach,
Auctioneers.

Ladies of Yellowbud church will serve dinner.

ALASKA WILL GROW OWN FARM PRODUCE

U. S. to Make Region Yield Fresh Vegetables, Etc.

Washington, D. C.—Gold, forests, fish and fur for long years were Alaska's only real important assets, but now we read in reports of the several agricultural experiment stations that real progress is being made in developing the agricultural resources of our farthest north possession. It is not the hope of the United States Department of Agriculture to make the soil of this region produce in great abundance, but there is good reason to believe that much of the food being shipped in can be grown there and that better supplies of fresh vegetables, fruit, and milk can be provided.

The government and settlers are growing cattle, sheep and goats. After some trials with different breeds hogs are being bred and raised successfully. Attempts are being made to cross the yak and common cattle just as has been done in central Asia for many years. The hardy, rustling, heavy-haired Galloways have been found admirably suited to the southwestern part of the territory, and this breed with the Holstein-Friesian is being used to produce reciprocal crosses which, it is hoped, will result in a hardy dairy type.

Hardy Grains Do Well.
Especially hardy strains of grains do well in the interior during most seasons, according to the report, and when the summer is wet or frosts come too soon the crops can be made into hay or silage. Tests are being made of promising varieties of spring wheat, and some work is being done with winter wheat, although there is little reason to believe that this type can equal spring wheat. Barley is the most promising stock grain as it matures much earlier than either spring wheat or oats, the latter being used almost entirely for hay. Hybridization experiments are being made on all these grains in an effort to develop higher-yielding and hardier varieties.

Bird Sex Change Spontaneous.

The change of the dove from female to male was described by Dr. Oscar Riddle of the Cold Spring Harbor experiment station. While such changes have been made artificially by the transplantation of tissue, this is said to be the first case on record where such a transformation occurred spontaneously.

The dove was a typical female and laid eggs for a time, then it stopped laying and increased in weight to nearly the size of a male dove. Its voice and habits changed to those of a male. It lived forty-four months after this change began. An autopsy showed that groups of cells had been destroyed by a tuberculous infection and had grown back or regenerated. Female cells had been destroyed and male cells regenerated.

"The scientific interest and importance of this can hardly be exaggerated," said Dr. Riddle, "since the result clearly indicates that no bodily or mental characteristic may be considered as irrevocably fixed and uncontrollable. It, therefore, becomes probable that all hereditary characteristics of every organism are capable of reversal and modification; and that the accomplishment of such modification and control is a matter which merely awaits the definitely directed efforts of investigators."

Ales Hrdlicka, who has just returned from a prolonged study of the remains of ancient man in Europe, said central Europe was undoubtedly "the cradle of the human race."

Tremendous populations of primitive men must have lived in various regions of Europe, and they can be traced back to the earliest known humans, he said, showing constant occupation of Europe by men from the first men to the present. The recent discovery of several varieties of ancient extinct apes in the same region indicated that it was here that humans emerged from some earlier stock bearing a family resemblance to the early ape stock.

Contradicts Old Theory.

Interest in Dr. Hrdlicka's paper was increased by the fact that it contradicted flatly the theory put forward by the American Museum of Natural History that central Asia was the cradle of the human race. The museum is sending an expedition there next year to prove it.

"The cradle of man," said Dr. Hrdlicka, "is not in some fabulous spot in central Asia where nobody has ever found anything."

Man is not the direct descendant of any ape or near ape, but from a distinct form having only a remote family resemblance to the ancestors of the gorilla and chimpanzee, according to Dr. Hrdlicka.

"Of course, if you go back far enough," said he, "you can find a common ancestor for them both. You can trace their ancestry back to the reptile, or if you go still further back, you can trace them both to a double ancestor."

Dr. Hrdlicka dated the emergence of distinct human beings from the ancestral brute at 400,000 or 500,000 years ago. The anthropologists of the American museum use a figure three or four times as great.

Religion 100,000 Years Ago.

Dr. Hrdlicka offered evidence that man for possibly 100,000 years had definite religious ideas and conceived of a future life. His evidence was based on recent studies of Neanderthal skeletons which indicated that the limbs had been carefully composed and the bodies buried after a fixed plan and with some kind of ceremonies.

"This can mean nothing but that a belief in a future life was already in existence," he said.

The theory of evolution held out the promise that man, who had advanced from such a low state, would go higher and higher, and that it was something like a sacrilege on that account to deny evolution.

A microscopic naval battle, with chemical warfare and other novelties, was described by William F. Kepner and John F. Baker of the University of Virginia. The minute combatants were the microstoma and the hydra.

With his eye on the microscope the observer can see the formidable hydra rush through the water, intending to use its "stinging threads" on the microstoma, an extremely simple organism of inoffensive appearance. Just as the threads are about to inflict their fatal sting the microstoma releases from its mouth a chemical which paralyzes the hydra. Science wins over brute force. The tiny microstoma slowly stuffs into its rudimentary stomach the body of the paralyzed hydra, but makes no attempt to swallow the deadly filaments.

"The stinging threads," say the authors, "lie about in an aimless manner. But eventually free moving cells of the microstoma's body carry these stinging threads over the surface of the microstoma."

The most remarkable fact is, however, that now the microstoma actually uses these threads that it has obtained from the hydra it has eaten to sting and locally paralyze other animals.

Plants Make Own Light.

Prof. Francis E. Lloyd of McGill university told of algae and other minute plants which took ordinary light and manufactured brilliant and vivid lights of their own. Under the microscope he showed specks of plant life which glowed like stained glass of vivid hues—deep red, orange, yellow and green. The light which entered the seemingly transparent cells was totally transformed. Its wave length was shortened and its color changed by the process known as fluorescence.

This is not a parlor trick, but a new method of reading secrets of life and growth of plants. The process of transforming light is closely connected with the production of the plant's food. When it is known how the plants produce new light, it will probably be known how they take carbon, their chief foodstuff, from the air. According to many scientists, the most important of all problems is to find out how plants capture carbon and to imitate it, so that man may control directly the apparatus of taking the all powerful energy of carbon from the atmosphere.

Landlord Faints When Books Are Demanded

New York.—When Abraham Levy heard that the books of J. H. Levy & Sons, Inc., of 116 West One Hundred and Twelfth street, of which he is secretary and treasurer, were to be impounded by the city court and examined to find the extent of his profits on real estate transactions he fainted and was carried from the witness chair in an adjoining room.

Levy admitted he operated in purchasing apartment house leases on long terms and subletting at a profit. Levy did not relish his cross-examination, and when it was over he withdrew his counter claim against the plaintiffs, Blauner Bros., who are suing for overdue rent, and accepted the judgment of the court against him for \$676.66.

Isidore Gainsburg, for the plaintiffs, refused to let the case drop, however, and asked Justice La Petra to have the books of the company impounded. At this point Levy toppled over.

New Device to Measure Speed of Projectiles

A new instrument to measure the speed of a projectile as it passes through the barrel of a gun has been devised by the bureau of standards at Washington. The movement of a projectile through a gun barrel with its following charge of gun from burning powder, experts found, causes an infinitesimal expansion followed instantaneously by contraction. The minute ripple thus produced is recorded electrically by the new device, which is expected to be of great value in working out improvements in guns, projectiles and explosives.

250,000 Feet of Lumber in Giant California Tree

A mammoth redwood, measuring 23 feet across the butt and 70 feet in circumference, was cut recently in the redwood forest near Crescent City, Cal., on the redwood highway. The tree was 300 feet tall. It will furnish 250,000 feet of lumber. It is pointed out that 50 cottages, each containing 5,000 feet of lumber, could be erected from the lumber cut from this single tree.

Fox Farming Growing Industry.
Although hardly known a decade ago, fox farming is a growing industry in this country, with 10,000 to 15,000 silver foxes being raised in captivity.

PUBLIC SALE.

The undersigned will offer for sale at the late residence of Cary Short, 8 miles southwest of Circleville, 3 miles west of Yellowbud, and five miles southeast of Williamsport, Ohio, on the Westfall road on

THURSDAY, FEBRUARY 7, 1924
commencing at 10 a. m. sharp, the following personal property:

50 HEAD OF HORSES, MULES AND PONIES

Consisting of 31 head of horses weighing from 1200 to 1800 pounds. Several good mated teams, 3-2 year old draft colts, 2 saddle horses, 9 head of ponies, 5 head of mules, 14 year old team will weigh 2700 pounds.

15 HEAD OF CATTLE
5 cows, 5 heifers, 5 calves.

100 HEAD OF HOGS
These hogs will weigh from 50 to 200 pounds.

FARM IMPLEMENTS, ETC.

One 1922 Hudson automobile, sport model, in good shape; about 30,000 brick, lot of lumber, windows, window frames, doors, galvanized roofing, slate roofing, harness, farming tools; household furniture consisting of 2 front room sets, 1 dresser, 4 chairs, 5 rocking chairs, 1 wardrobe, 1 stand, 1 wash stand, several large pictures and other articles too numerous to mention.

Terms made known on day of sale.

AMUSEMENTS

A brilliant cast and a story abounding in thrills are to be found in "Pleasure Mad," the photoplay which opened last night at the Met theater.

The vehicle easily affords Mary Alden the best role she has had since "The Old Nest." Huntly Gordon, who was featured in "The Famous Mrs. Fair" plays opposite her and gives a capital performance. Other members of the cast who lend distinction to their roles include William Collier Jr., Norma Shearer, Winifred Bryson and Frederick Truesdell.

"Pleasure Mad" was adapted for the screen by A. P. Younger from Blanche Upright's novel "The Valley of Content." It is a Reginald Barker production for the Metro Louis B. Mayer forces, photographed by Norbert Brodine.

In Memoriam.

Editor Union-Herald:—Ella Weaver, daughter of Levi and Sarah Weaver, was born in Perry township, Hocking county, Ohio, October 22, 1867, and departed this life February 1, 1924, aged 56 years, three months and nine days. She was married to George W. Cox November 15, 1898. To this union were born five children; Ernest, Samuel, Russell, Ethel and John.

She was converted and joined the Union Methodist Episcopal church at the age of fifteen years and remained a member of the same until death. She had been a great sufferer for several years but during her afflictions she had an unwavering faith in her Savior. She was cheerful and when at all able would sing hymns of praise to Him. She lamented leaving her family, for she realized how much they needed a mother; but said she was homesick for her heavenly home where so many of her loved ones had gone and where she would be free from suffering and sorrow. She urged her loved ones to live Christian lives and do all the good they could in the world, so they would have no regrets when they were called to leave.

The deceased was a good wife, an indulgent mother, willing to make any sacrifice for the happiness and comfort of her family. She was an obliging neighbor, ready to do a kindness to anyone in need and when her health would permit she would often be found in homes of sickness and sorrow, ready to sympathize and help the afflicted. A husband, five children one grandchild, three sisters, two brothers and many relatives, friends and neighbors are left to mourn and await the call of the Master.

Funeral services were conducted from the M. E. church at Tarlton at 1:30 o'clock the Sunday following, conducted by the pastor, Rev. P. A. Harlan, of Tarlton. Burial in the family lot in the cemetery at Tarlton. The pallbearers were Nelson and Ed. Aldenderfer, Harrison and Roy Waits, Daniel and William Fogler, nephews of the deceased.

Card of Thanks.

We wish to express our sincere thanks and gratitude to the many neighbors and friends who so willingly assisted us during the illness and after the death of our dear wife and mother, and also for their kind expressions of sympathy in our recent bereavement.

George W. Cox And Children.

KEWPIE DOLLS FREE.

The Elks will distribute kewpie dolls and anyone is eligible to enter the dressing contest. Three cash prizes will be given. The first prize for the best dressed, \$5; second, \$3; and third, \$2. Ask for one at the wholesale grocery of W. J. Weaver & Son. Miss Blanche McCrady will be in charge of distribution. You can also get a kewpie at the T. K. Brunner & Son jewelry store on West Main street.

PICKAWAY TOWNSHIP SCHOOL.

The parents and patrons of the Pickaway township schools are urged to attend the February meeting of the Parent-Teachers' association, which will be held in the school auditorium Friday afternoon, February 8, beginning at 2 o'clock. A patriotic program will be rendered.

POLITICAL ANNOUNCEMENT.

The profound sensation at the Columbus Automobile Show is the New Chrysler Six. Don't fail to see it. The New Chrysler Six is handled in this territory by the Leach Motor Car Co. 6febdlw.

VIRGIN ISLANDS ARE BEING DEPOPULATED

Residents No Longer Able to Earn Living.

New York.—Out of the 26,000 native inhabitants who, at one time constituted the entire population of the Virgin Islands, 8,000 of them are walking the streets of Harlem today.

This unusual exodus from St. Thomas, St. John and St. Croix to New York has been gaining impetus for two years. A feeling of apprehension exists among prominent "Islanders" that, unless the economic status of the natives is improved, two-thirds of those now remaining will be Harlem-bound just as soon as their finances will permit.

Opportunity to earn bread and butter is the question of the moment in the Virgin Islands. The people are out of work. The scale of wages is from 12 to 22 cents an hour—when one is fortunate enough to obtain employment, and then it is only for seven or ten days in a month. There is no such thing as steady employment.

Relations Send Money.

"If work is so scarce and the people can earn but little money, how do they manage to make their way to New York in such large numbers?" Rothschild Francis, editor of the St. Thomas Emancipator, who is in this country seeking to impress officials at Washington with the gravity of the situation, was asked.

"It costs \$45 to travel steerage from St. Thomas to New York. Natives living in New York send money to relatives and friends and in this way the Virgin Islands are being steadily depopulated," was the answer.

Virgin Islanders have formed organizations in Harlem and, through united effort on their part, the negro population north of One Hundred and Twenty-fifth street is being materially increased.

Prohibition Blamed.

Prohibition is primarily responsible for the economic plight of the islands purchased by the United States from Denmark in 1917 for \$25,000,000, is the contention of Francis.

"St. Thomas was famous for its bay rum and St. Croix equally as famous for its sugar-cane rum, but now we are not permitted to make sugar-cane rum and there is little demand for bay rum in which there is salicylic acid," Francis said.

"St. Thomas has modern wharfs and can accommodate the biggest ships, but no longer do they touch the islands to take on coal, oil or water. There are reasons for this unofficial boycott. Ships are not searched for liquor at Jamaica, the Barbados and other ports, as at St. Thomas. Then they have been made free ports of entry, while St. Thomas is a port of call and subjected to drastic quarantine regulations."

Constructive Measures.

"With foreign ships refusing to touch St. Thomas, there is but little work for stevedores. Commerce is at a standstill and the amount of money in circulation is small. The legislators serve without pay. We are now asking leaders at Washington to have congress enact remedial legislation enabling us to deal with foreign ships the same as they do in Panama and the Philippines, two of the United States' possessions. We do not want to engage in the traffic of liquor—we only desire certain restrictive measures lifted."

Insignia for Guards

Made in Germany

Portland, Ore.—A general order was issued recently to officers of the Oregon National Guard requiring them to purchase new gilt or gold insignia for their uniforms in line with War department orders to the regular army. The insignia arrived and was being distributed when Col. Hiram U. Welch, commander of the troops in this county, discovered stamped on the back of the coat of arms of the United States which he was about to fasten to the front of his cap, the legend, "Made in Germany." All of the officers declined to wear the insignia.

Lion Gnaws Way Out of Cage in Express Car

Kansas City.—A lion being shipped from Hutchinson, Kan., to Floyd King of Louisville gnawed the wood away from two iron bars in his cage and roamed free in two connecting express cars as a Santa Fe passenger train sped eastward to this city. The beast was padding around among express parcels in the cars, which were switched to the Argentine (Kan.) yards, and the superintendent of the Swope park zoo here was summoned to cage the animal.

City Finds Auto Is Not Worth Its Keep

Bayonne, N. J.—This city sold at public auction recently a small automobile for \$6.50, for the storage of which the city is the defendant in a suit for \$528. The automobile was found abandoned here two years ago and put in storage at the garage of J. B. Fitzmaurice. He, being unable to secure removal of it by the city, charged the latter for storage. The bill has not been paid and the suit is now pending.

PERSONALS

Samuel Tatman of Plain City, was a business visitor here Wednesday.

Mrs. Albert Crist and Mrs. Charles Mason spent the day in Columbus.

Mrs. W. M. Arledge is visiting her sister, Mrs. William Heffern, in Columbus.

J. C. Rader spent the day in Ashville, the guest of his sister, Mrs. L. C. Odaffer.

William Corcoran of Yellowbud, is attending the Farmers' meeting in Columbus.

Thomas Hockman of Saltcreek township attended the Farmers' meeting in Columbus today.

Mr. and Mrs. J. W. Johnson are attending the meeting of the Ohio Associated Dairies in Columbus.

Mr. and Mrs. John Fry, Mrs. Cora Hood and Mrs. Ott Rader spent Tuesday in Columbus attending the Farmers' meeting.

Miss Frances Mason, a student at the O. S. U., who has been home on a short vacation visiting her parents, Mr. and Mrs. Frank Mason of Watt street, returned to her studies Tuesday.

Mr. and Mrs. H. G. Stevenson, T. O. Gilliland, Miss Charlotte Phelps and Miss Bertha Warner attended a meeting of the Ohio Society for Crippled Children in session at Washington C. H.

Walker Baughman, Frank H. Smith, A. C. Cook, L. F. Smithhisler, Earl Smith, Curtis Bartley, Senet Cryder Warren Baker, C. E. Roof, Charles Bell, D. S. Dunlap and H. E. Betz attended a meeting of the lodge of Elks at Newark and advertised the Elks fair to be held here this month.

REBELS QUIT VERA CRUZ

Evacuation Means Collapse of Revolt on the Gulf Coast.

Washington, Feb. 6.—De la Huerta, leader of the Mexican rebellion, and his followers have fled from Vera Cruz, the state department announced. This is believed to mean the collapse of the revolt on the Gulf coast of Mexico, officials stated, although the dispatch from American Consul Wood at Vera Cruz was without detail. It simply stated that the "provisional capital" of the rebels awakened to learn that their leader and a party of politicians had disappeared during the night. The city was evacuated by the rebel leaders because of the dangerous proximity of advancing federal troops and grave reverses to the rebel army. It also was believed that De la Huerta would have difficulty in making his way to any other port ahead of the federal advance.

Planes Crash in Midair.

Paris, Feb. 6.—Two French military monoplane crashed together 3,500 feet in the air. The accident occurred above Saint Priest. Both aviators are believed to have been killed in the collision before the planes started on their plunge to earth.

De La Huerta Quits Mexico.

Mexico City, Feb. 6.—Don Adolfo De la Huerta fled from Vera Cruz. The civil head of the southern rebellion, with others of his leaders, departed from the provisional capital by water. It is presumed they are headed for Progresso, Yucatan. Only a small rebel garrison is left at the port of Vera Cruz. President Obregon telephoned the war office informing the government of the flight of the rebels. Private overland messages also confirmed it.

Daugherty to Return.

Washington, Feb. 6.—It was learned that Attorney General Daugherty will return to Washington from Florida immediately. He is expected to reach Washington on a train arriving here early Saturday morning. He will be met en route by his confidential secretary, Warren F. Martin. If the president has summoned the attorney general the information was not made available at the white house. Mr. Martin, however, saw the president for a few minutes and left in haste.

Two Outlaws Killed.

Little Rock, Ark., Feb. 6.—Officers searching for Emory Connell and Eulos Sullivan, near Redfield, 25 miles south of this city, shot and killed both men. None of the officers or posse was injured except Fred Snodgrass, a reporter, who was shot in the foot when the bandits opened fire on their pursuers. The bodies of the two bandits were riddled with bullets.

Every Man Will Have One!

Sedentary workers—those who sit at their work—especially might note that if they have the habit of crossing their legs, then can't break themselves of it, they should have a clean duster, or a remnant of soft cloth, and lay it on the under leg. That at once stops the shine and wear that follows "crossing." And, as a duster is not always at hand, and "crossing" is always a temptation, best to cut the crossing habit clean out. A real and most saving economy.—London Answers.

Business Service Aid for Farmers

To Meet Changed Conditions New Forms Have Been Devised.

(Prepared by the United States Department of Agriculture.)

To assist American farmers in organizing their business to meet the changed economic conditions of present-day agriculture, new forms of agricultural information have been developed, and fundamental studies in farm organization, marketing and crop estimates have been expended by the bureau of agricultural economics during the past year, according to the annual report of the bureau.

"In the period of agricultural readjustment experienced during the past year, it was important for farmers to secure the facts bearing upon current problems that would give them the greatest aid in making accurate decisions in planning farm operations and in marketing their products," says the report. "The first attention of the bureau staff has been directed constantly toward these problems in response to the greatly increased demands upon the bureau for information on the general conditions of supply and demand, price trends, the effect of various domestic and foreign factors upon the farmer's returns, and for information bearing upon problems of crop readjustment."

Live Stock Surveys Help.

Special effort was made to strengthen present crop and live stock reporting methods, and to supplement these methods by surveys designed to give a more accurate knowledge of future supplies. The semi-annual pig surveys which give an indication of intentions of farmers regarding the production of hogs, and the reports of farmers' intentions to plant various crops are outlined as indicating the bureau's activities along this line. Numerous mechanical and other methods have also been developed to obtain maximum accuracy in acreage and production estimates.

A world-wide crop and market reporting service was developed by the bureau, to obtain the essential facts concerning probable foreign competition and demand for American farm products. Agricultural commissioners in England and Europe, and the International Institute of Agriculture at Rome keep the bureau constantly informed, regarding the current foreign agricultural situation. This news is broadcast by the bureau to farmers by radio and the press.

A study of the factors that influence the market demand in domestic markets, as expressed in the prices and movement of crops and in consumers' requirements was made. Results of several years of farm management surveys were reviewed to secure facts of value in the present agricultural readjustment, the objective being shifted somewhat from studies with the historical point of view to the current readjustment point of view.

A steady growth in the bureau's work in warehousing, improved farm finance and in the study of agricultural co-operation is required. The correlation of various research projects conducted by state and federal institutions such as in the establishment of the New England research council on marketing and food supply is also regarded as a forward step. A similar council has been planned for the Middle West.

Market News Service.

The market activities of the bureau have been extended along the lines of research, standardization, market news, and food products inspection at shipping points and terminal markets. Grades were prepared for hay, wool, tobacco, rice, rye, peanuts, dressed meats, and a number of fruits and vegetables.

Farm management studies were expanded during the year to include studies of farm income on various types of farms, farm production in localities adjacent to cities, the organization of cane sugar farms, a special survey of cotton farms in boll weevil districts, studies of the earlier farm management records, surveys of regions on which studies have been made in previous years to discover important changes in management. Cost of production work was expanded to include wheat, cotton, tobacco, fruits, sugar beets, sugar cane, and cattle.

This extended service to farmers was made possible largely by the consolidation of three former bureaus into what is now the bureau of agricultural economics. In the new bureau the identity and the organization of the various lines of work formerly handled in the three bureaus has been preserved in the associated divisions under the three groups of production, marketing, and problems dealing with the economic phases of both production and marketing.

Rotted Manure Excellent Fertilizer for Cucumber

Rotted manure is an excellent fertilizer for cucumber plants. The mixing of acid phosphate with manure is to be advised. If added before the nitrogen has a chance to escape it will hold the nitrogen in the manure. Acid phosphate contains gypsum and gypsum has this same power to hold the nitrogen, but acid phosphate is more effective than is gypsum alone and, of course, contributes valuable phosphorus. Acid phosphate retards the fermentation of the manure.

Acid phosphate may be added either before or after composting and in either case is a valuable addition.

WILSON EULOGIZED.

At the meeting of the chamber of commerce held Tuesday evening, Ex-president Woodrow Wilson was eulogized. Rev. G. J. Troutman delivered a fine address and said that history will record Woodrow Wilson as one of the greatest men of the present day. He had enemies, so did Lincoln and Roosevelt. In their day people do not show them the homage that they are shown after death. We now reverse both Lincoln and Roosevelt and if not in our days it will be in the days of our children, that Wilson's name will be linked with both of those great men. He will be known as the father of the League of Nations and his name will go down to posterity as a great and good man.

Editor Union-Herald:—Ella Weaver, daughter of Levi and Sarah Weaver, was born in Perry township, Hocking county, Ohio, October 22, 1867, and departed this life February 1, 1924, aged 56 years, three months and nine days. She was married to George W. Cox November 15, 1898. To this union were born five children: Ernest, Samuel, Russell, Ethel and John.

She was converted and joined the Union Methodist Episcopal church at the age of fifteen years and remained a member of the same until death. She had been a great sufferer for several years but during her afflictions she had an unwavering faith in her Savior. She was cheerful and when at all able would sing hymns of praise to Him. She lamented leaving her family, for she realized how much they needed a mother; but said she was homesick for her heavenly home where so many of her loved ones had gone and where she would be free from suffering and sorrow. She urged her loved ones to live Christian lives and do all the good they could in the world, so they would have no regrets when they were called to leave.

The deceased was a good wife, an indulgent mother, willing to make any sacrifice for the happiness and comfort of her family. She was an obliging neighbor, ready to do a kindness to anyone in need and when her health would permit she would often be found in homes of sickness and sorrow, ready to sympathize and help the afflicted. A husband, five children one grandchild, three sisters, two brothers and many relatives, friends and neighbors are left to mourn and await the call of the Master.

Funeral services were conducted from the M. E. church at Tarlton at 1:30 o'clock the Sunday following, conducted by the pastor, Rev. P. A. Harlan, of Tarlton. Burial in the family lot in the cemetery at Tarlton. The pallbearers were Nelson and Ed. Aldenderfer, Harrison and Roy Waits, Daniel and William Fogler, nephews of the deceased.

Card of Thanks.

We wish to express our sincere thanks and gratitude to the many neighbors and friends who so willingly assisted us during the illness and after the death of our dear wife and mother, and also for their kind expressions of sympathy in our recent bereavement.

George W. Cox And Children.

KEWPIE DOLLS FREE.

The Elks will distribute kewpie dolls and anyone is eligible to enter the dressing contest. Three cash prizes will be given. The first prize for the best dressed, \$5; second, \$3; and third, \$2. Ask for one at the wholesale grocery of W. J. Weaver & Son. Miss Blanche McCrady will be in charge of distribution. You can also get a kewpie at the T. K. Brunner & Son jewelry store on West Main street.

PICKAWAY TOWNSHIP SCHOOL.

The parents and patrons of the Pickaway township schools are urged to attend the February meeting of the Parent-Teachers' association, which will be held in the school auditorium Friday afternoon, February 8, beginning at 2 o'clock. A patriotic program will be rendered.

POLITICAL ANNOUNCEMENT.

Claude Ater, deputy county treasurer, will be a candidate for nomination as county treasurer in the next Democratic primaries. 6febdlw.

The profound sensation at the Columbus Automobile Show is the New Chrysler Six. Don't fail to see it. The New Chrysler Six is handled in this territory by the Leach Motor Car Co. 6febdlw.

VIRGIN ISLANDS ARE BEING DEPOPULATED

Residents No Longer Able to Earn Living.

New York.—Out of the 26,000 native inhabitants who, at one time constituted the entire population of the Virgin Islands, 8,000 of them are walking the streets of Harlem today.

This unusual exodus from St. Thomas, St. John and St. Croix to New York has been gaining impetus for two years. A feeling of apprehension exists among prominent "Islanders" that, unless the economic status of the natives is improved, two-thirds of those now remaining will be Harlem-bound just as soon as their finances will permit.

Opportunity to earn bread and butter is the question of the moment in the Virgin Islands. The people are out of work. The scale of wages is from 12 to 22 cents an hour—when one is fortunate enough to obtain employment, and then it is only for seven or ten days in a month. There is no such thing as steady employment.

Relations Send Money.

"If work is so scarce and the people can earn but little money, how do they manage to make their way to New York in such large numbers?" Rothschild Francis, editor of the St. Thomas Emancipator, who is in this country seeking to impress officials at Washington with the gravity of the situation, was asked.

"It costs \$45 to travel steamer from St. Thomas to New York. Natives living in New York send money to relatives and friends and in this way the Virgin Islands are being steadily depopulated," was the answer.

Virgin Islanders have formed organizations in Harlem and, through united effort on their part, the negro population north of One Hundred and Twenty-fifth street is being materially increased.

Prohibition Blamed.

Prohibition is primarily responsible for the economic plight of the islands purchased by the United States from Denmark in 1917 for \$25,000,000, is the contention of Francis.

"St. Thomas was famous for its bay rum and St. Croix equally as famous for its sugar-cane rum, but now we are not permitted to make sugar-cane rum and there is little demand for bay rum in which there is salicylic acid," Francis said.

"St. Thomas has modern wharfs and can accommodate the biggest ships, but no longer do they touch the islands to take on coal, oil or water. There are reasons for this unofficial boycott. Ships are not searched for liquor at Jamaica, the Barbados and other ports, as at St. Thomas. Then they have been made free ports of entry, while St. Thomas is a port of call and subjected to drastic quarantine regulations."

Constructive Measures.

"With foreign ships refusing to touch St. Thomas, there is but little work for stevedores. Commerce is at a standstill and the amount of money in circulation is small. The legislators serve without pay. We are now asking leaders at Washington to have congress enact remedial legislation enabling us to deal with foreign ships the same as they do in Panama and the Philippines, two of the United States' possessions. We do not want to engage in the traffic of liquor—we only desire certain restrictive measures lifted."

Insignia for Guards

Made in Germany

Portland, Ore.—A general order was issued recently to officers of the Oregon National Guard requiring them to purchase new gilt or gold insignia for their uniforms in line with War department orders to the regular army. The insignia arrived and was being distributed when Col. Hiram U. Welch, commander of the troops in this county, discovered stamped on the back of the coat of arms of the United States which he was about to fasten to the front of his cap, the legend, "Made in Germany." All of the officers declined to wear the insignia.

Lion Gnaws Way Out of Cage in Express Car

Kansas City.—A lion being shipped from Hutchinson, Kan., to Floyd King of Louisville gnawed the wood away from two iron bars in his cage and roamed free in two connecting express cars as a Santa Fe passenger train sped eastward to this city. The beast was padding around among express parcels in the cars, which were switched to the Argentine (Kan.) yards, and the superintendent of the Swope park zoo here was summoned to cage the animal.

City Finds Auto Is Not Worth Its Keep

Bayonne, N. J.—This city sold at public auction recently a small automobile for \$6.50, for the storage of which the city is the defendant in a suit for \$328. The automobile was found abandoned here two years ago and put in storage at the garage of J. B. Fitzmaurice. He, being unable to secure removal of it by the city, charged the latter for storage. The bill has not been paid and the suit is now pending.

PERSONALS

Samuel Tatman of Plain City, was a business visitor here Wednesday.

Mrs. Albert Crist and Mrs. Charles Mason spent the day in Columbus.

Mrs. W. M. Arledge is visiting her sister, Mrs. William Heffern, in Columbus.

J. C. Rader spent the day in Ashville, the guest of his sister, Mrs. L. C. Odaffer.

William Corcoran of Yellowbud, is attending the Farmers' meeting in Columbus.

Thomas Hockman of Saltcreek township attended the Farmers' meeting in Columbus today.

Mr. and Mrs. J. W. Johnson are attending the meeting of the Ohio Associated Dailies in Columbus.

Mr. and Mrs. John Fry, Mrs. Cora Hood and Mrs. Ott Rader spent Tuesday in Columbus attending the Farmers' meeting.

Miss Frances Mason, a student at the O. S. U., who has been home on a short vacation visiting her parents, Mr. and Mrs. Frank Mason of Watt street, returned to her studies Tuesday.

Mr. and Mrs. H. G. Stevenson, T. O. Gilliland, Miss Charlotte Phelps and Miss Bertha Warner attended a meeting of the Ohio Society for Crippled Children in session at Washington C. H.

Walker Baughman, Frank H. Smith, A. C. Cook, L. F. Smithhisler, Earl Smith, Curtis Bartley, Senet Cryder Warren Baker, C. E. Roof, Charles Bell, D. S. Dunlap and H. E. Betz attended a meeting of the lodge of Elks at Newark and advertised the Elks fair to be held here this month.

REBELS QUIT VERA CRUZ

Evacuation Means Collapse of Revolt on the Gulf Coast.

Washington, Feb. 6.—De la Huerta, leader of the Mexican rebellion, and his followers have fled from Vera Cruz, the state department announced. This is believed to mean the collapse of the revolt on the Gulf coast of Mexico, officials stated, although the dispatch from American Consul Wood at Vera Cruz was without detail. It simply stated that the "provisional capital" of the rebels awakened to learn that their leader and a party of politicians had disappeared during the night. The city was evacuated by the rebel leaders because of the dangerous proximity of advancing federal troops and grave reverses to the rebel army. It also was believed that De la Huerta would have difficulty in making his way to any other port ahead of the federal advance.

Planes Crash in Midair.

Paris, Feb. 6.—Two French military monoplane crashed together 3,500 feet in the air. The accident occurred above Saint Priest. Both aviators are believed to have been killed in the collision before the planes started on their plunge to earth.

De La Huerta Quits Mexico.

Mexico City, Feb. 6.—Don Adolfo De la Huerta fled from Vera Cruz. The civil head of the southern rebellion, with others of his leaders, departed from the provisional capital by water. It is presumed they are headed for Progresso, Yucatan. Only a small rebel garrison is left at the port of Vera Cruz. President Obregon telephoned the war office informing the government of the flight of the rebels. Private overland messages also confirmed it.

Daugherty to Return.

Washington, Feb. 6.—It was learned that Attorney General Daugherty will return to Washington from Florida immediately. He is expected to reach Washington on a train arriving here early Saturday morning. He will be met en route by his confidential secretary, Warren F. Martin. If the president has summoned the attorney general the information was not made available at the white house. Mr. Martin, however, saw the president for a few minutes and left in haste.

Two Outlaws Killed.

Little Rock, Ark., Feb. 6.—Officers searching for Emory Council and Eulios Sullivan, near Redfield, 25 miles south of this city, shot and killed both men. None of the officers or posse was injured except Fred Snodgrass, a reporter, who was shot in the foot when the bandits opened fire on their pursuers. The bodies of the two bandits were riddled with bullets.

Every Man Will Have One!

Sedentary workers—those who sit at their work—especially might note that if they have the habit of crossing their legs, then can't break themselves of it, they should have a clean duster, or a remnant of soft cloth, and lay it on the under leg. That at once stops the shine and wear that follows "crossing." And, as a duster is not always at hand, and "crossing" is always a temptation, best to cut the crossing habit clean out. A real and most saving economy.—London Answers.

Business Service Aid for Farmers

To Meet Changed Conditions New Forms Have Been Devised.

(Prepared by the United States Department of Agriculture.)

To assist American farmers in organizing their business to meet the changed economic conditions of present-day agriculture, new forms of agricultural information have been developed, and fundamental studies in farm organization, marketing and crop estimates have been expended by the bureau of agricultural economics during the past year, according to the annual report of the bureau.

"In the period of agricultural readjustment experienced during the past year, it was important for farmers to secure the facts bearing upon current problems that would give them the greatest aid in making accurate decisions in planning farm operations and in marketing their products," says the report. "The first attention of the bureau staff has been directed constantly toward these problems in response to the greatly increased demands upon the bureau for information on the general conditions of supply and demand, price trends, the effect of various domestic and foreign factors upon the farmer's returns, and for information bearing upon problems of crop readjustment."

Live Stock Surveys Help.

Special effort was made to strengthen present crop and live stock reporting methods, and to supplement these methods by surveys designed to give a more accurate knowledge of future supplies. The semi-annual pig surveys which give an indication of intentions of farmers regarding the production of hogs, and the reports of farmers' intentions to plant various crops are outlined as indicating the bureau's activities along this line. Numerous mechanical and other methods have also been developed to obtain maximum accuracy in acreage and production estimates.

A world-wide crop and market reporting service was developed by the bureau, to obtain the essential facts concerning probable foreign competition and demand for American farm products. Agricultural commissioners in England and Europe, and the International Institute of Agriculture at Rome keep the bureau constantly informed, regarding the current foreign agricultural situation. This news is broadcast by the bureau to farmers by radio and the press.

A study of the factors that influence the market demand in domestic markets, as expressed in the prices and movement of crops and in consumers' requirements was made. Results of several years of farm management surveys were reviewed to secure facts of value in the present agricultural readjustment, the objective being shifted somewhat from studies with the historical point of view to the current readjustment point of view.

A steady growth in the bureau's work in warehousing, improved farm finance and in the study of agricultural co-operation is required. The correlation of various research projects conducted by state and federal institutions such as in the establishment of the New England research council on marketing and food supply is also regarded as a forward step. A similar council has been planned for the Middle West.

Market News Service.

The market activities of the bureau have been extended along the lines of research, standardization, market news, and food products inspection at shipping points and terminal markets. Grades were prepared for hay, wool, tobacco, rice, rye, peanuts, dressed meats, and a number of fruits and vegetables.

Farm management studies were expanded during the year to include studies of farm income on various types of farms, farm production in localities adjacent to cities, the organization of cane sugar farms, a special survey of cotton farms in boll weevil districts, studies of the earlier farm management records, surveys of regions on which studies have been made in previous years to discover important changes in management. Cost of production work was expanded to include wheat, cotton, tobacco, fruits, sugar beets, sugar cane, and cattle.

This extended service to farmers was made possible largely by the consolidation of three former bureaus into what is now the bureau of agricultural economics. In the new bureau the identity and the organization of the various lines of work formerly handled in the three bureaus has been preserved in the associated divisions under the three groups of production, marketing, and problems dealing with the economic phases of both production and marketing.

Rotted Manure Excellent Fertilizer for Cucumber

Rotted manure is an excellent fertilizer for cucumber plants. The mixing of acid phosphate with manure is to be advised. If added before the nitrogen has a chance to escape it will hold the nitrogen in the manure. Acid phosphate contains gypsum and gypsum has this same power to hold the nitrogen, but acid phosphate is more effective than is gypsum alone and, of course, contributes valuable phosphorus. Acid phosphate retards the fermentation of the manure.

Acid phosphate may be added either before or after composting and in either case is a valuable addition.

WILSON EULOGIZED.

At the meeting of the chamber of commerce held Tuesday evening, Ex-president Woodrow Wilson was eulogized. Rev. G. J. Troutman delivered a fine address and said that history will record Woodrow Wilson as one of the greatest men of the present day. He had enemies, so did Lincoln and Roosevelt. In their day people do not show them the homage that they are shown after death. We now revere both Lincoln and Roosevelt and if not in our days it will be in the days of our children, that Wilson's name will be linked with both of those great men. He will be known as the father of the League of Nations and his name will go down to posterity as a great and good man.

Sense of Humor.

A sense of humor is a very fine thing. It lifts one over life's rough places as it were, with a leap and a bound, and lands one in safety on the farther bank of the swollen and threatening stream. You keep young if you possess it; the twinkle in your eye is a sign that old age is far from you yet, whatever your years may be. All the same, a sense of humor is a gift which must be displayed with discretion. The trouble is that, with most of us, it stops working when we need it most—that is, when things go wrong with our own affairs. The man who can smile when this happens is a hero.—Philadelphia Record.

Plain Dumplings by an Imperial Decree

Unhappy Austria has too recently emerged from the dread shadow of famine for any Austrian not utterly callous or frivolous to regard wholesome food of any kind with contempt. But it was not always so. Nearly a hundred years ago when tourists from America were rare—so we learn from the "Reminiscences of an Idler"—an American visiting Vienna found everyone laughing at the latest whim of the Emperor Ferdinand, who was an amiable and thick-witted monarch, deeply interested in petty and personal matters and not in the least interested in large and national affairs.

Hunting not long before in the Styrian mountains, Ferdinand and his attendants were overtaken by a violent thunderstorm and found refuge in the nearest farm house, the occupants of which were about to dine. The good-natured emperor ordered them to proceed with their meal, and presently, sniffing the savory odor of a smoking dish of dumplings that the housewife had just set upon the table, he announced that he should like to taste one. They were made of coarse flour dropped in a vegetable broth, but they were well-flavored, hot and feathery light; and when the proud farmer's wife served him he not only ate his trial dumpling with gusto but passed his plate for another and yet another. In fact, his equerries and courtiers had never seen him display such an appetite. That was all very well as part of a passing adventure, but when, on returning to the palace, he ordered the cooks to produce the same sort of dumplings daily as a regular part of the imperial dinner, there was widespread dismay. The empress was mortified; the courtiers were shocked; the cooks were indignant; the grand chamberlain remonstrated, and the court physician was induced to declare that dumplings were ruinous to any except peasant digestions and must be given up. But to the general astonishment the emperor, who usually was docile and easy-going, absolutely refused to surrender his new fancy. He grew angry—furious—apoplectic—imperial! He brought down his fist with a bang and cried:

"Emperor I am, and dumplings I will have!"

Naturally he had his dumplings. But the phrase became a common by-word. Any one who insisted upon a silly whim of any kind was sure to hear some one quote mockingly for his benefit, "Emperor I am, and dumplings I will have!"

Ferdinand was not the only emperor who was partial to plebeian foods; Napoleon I delighted in onion soup, and Napoleon II many times drove his chef to the verge of resigning his position by demanding that boiled cabbage be served with partridge. The French emperors, however, concerned themselves with many other matters quite outside the range of palace and kitchen. It might have been as well for the world if they had stuck to dumplings.—Youth's Companion.

Worthy Life Lives In Memory.

When the sun goes below the horizon, he is not set; the heavens glow for a full hour after his departure. And when a great and good man sets, the sky of this world is luminous long after he is out of sight.—Beecher.

How to File Saws

Almost any one with a bit of mechanical ability can learn to file saws. All the equipment necessary is a set of three or four files of various sizes and degrees of fineness and a clamp to hold the blade in while the filing operation is in progress. One must learn to hold the file evenly and to draw it back and forth with even pressure the full length of the cutting surface. It does not injure the file or the work to pull it back in contact with the cut surface, even though many careful workmen seem to think that it does and prefer to lift it each time. The set of the teeth of the saw should be carefully noticed before the work begins.

Never use a file on tools more highly tempered than the file itself, for this will ruin it. One set of files should be kept for the hard metals, such as iron and steel, and another for such soft metals as the artisan is often called to cut, like brass.

The Cynic.

A cynic is in many instances a super-idealizer who believes the world could be perfect by rectifying a few slight errors which he takes the trouble to point out.

Ford
THE UNIVERSAL CAR

Forecasting A Tremendous
Spring Demand

739,626

more Ford cars and trucks were produced last year than the previous year, an increase of over 50 per cent.

In spite of this tremendous increase in production, it was impossible to meet delivery requirements during the spring and summer months when orders for 350,000 Ford Cars and Trucks could not be filled.

This year winter buying for immediate delivery has been more active than ever before—and in addition 200,000 orders have already been booked through the Ford Weekly Purchase Plan for spring delivery.

These facts clearly indicate that the demand during this spring and summer will be far greater than ever, and that orders should be placed immediately with Ford Dealers as a means of protection against delay in securing your Ford Car or Truck or Fordson Tractor.

Ford Motor Company
Detroit, Michigan

A small deposit down, with easy payments of the balance arranged, or your enrollment under the Ford Weekly Purchase Plan, will put your order on the preferred list for spring delivery.

Sense of Humor.

A sense of humor is a very fine thing. It lifts one over life's rough places as it were, with a leap and a bound, and lands one in safety on the farther bank of the swollen and threatening stream. You keep young if you possess it; the twinkle in your eye is a sign that old age is far from you yet, whatever your years may be. All the same, a sense of humor is a gift which must be displayed with discretion. The trouble is that, with most of us, it stops working when we need it most—that is, when things go wrong with our own affairs. The man who can smile when this happens is a hero.—Philadelphia Record.

SERVICE PLUS CO-OPERATION

In order to handle efficiently our increasing amount of delivering it is absolutely necessary to have roasts and boiling meat orders in before 7:45 a. m.

We have two deliveries one at 8 o'clock and the other at 10 o'clock.

Steaks and chops will be delivered at 10 o'clock, call before 9:45 a. m.

If more convenient call the day before, thus increasing the efficiency of our delivering.

Yours for better service,
HENN BROS.

Plain Dumplings by an Imperial Decree

Unhappy Austria has too recently emerged from the dread shadow of famine for any Austrian not utterly callous or frivolous to regard wholesome food of any kind with contempt. But it was not always so. Nearly a hundred years ago when tourists from America were rare—so we learn from the "Reminiscences of an Idler"—an American visiting Vienna found everyone laughing at the latest whim of the Emperor Ferdinand, who was an amiable and thick-witted monarch, deeply interested in petty and personal matters and not in the least interested in large and national affairs.

Hunting not long before in the Styrian mountains, Ferdinand and his attendants were overtaken by a violent thunderstorm and found refuge in the nearest farm house, the occupants of which were about to dine. The good-natured emperor ordered them to proceed with their meal, and presently, sniffing the savory odor of a smoking dish of dumplings that the housewife had just set upon the table, he announced that he should like to taste one. They were made of coarse flour dropped in a vegetable broth, but they were well-flavored, hot and feathery light; and when the proud farmer's wife served him he not only ate his trial dumpling with gusto but passed his plate for another and yet another. In fact, his equestrian and courtiers had never seen him display such an appetite. That was all very well as part of a passing adventure, but when, on returning to the palace, he ordered the cooks to produce the same sort of dumplings daily as a regular part of the imperial dinner, there was widespread dismay. The empress was mortified; the courtiers were shocked; the cooks were indignant; the grand chamberlain remonstrated, and the court physician was induced to declare that dumplings were ruinous to any except peasant digestions and must be given up. But to the general astonishment the emperor, who usually was docile and easy-going, absolutely refused to surrender his new fancy. He grew angry—furious—apoplectic—imperial! He brought down his fist with a bang and cried:

"Emperor I am, and dumplings I will have!"

Naturally he had his dumplings. But the phrase became a common by-word. Any one who insisted upon a silly whim of any kind was sure to hear some one quote mockingly for his benefit, "Emperor I am, and dumplings I will have!"

Ferdinand was not the only emperor who was partial to plebeian foods; Napoleon I delighted in onion soup, and Napoleon II many times drove his chef to the verge of resigning his position by demanding that boiled cabbage be served with partridge. The French emperors, however, concerned themselves with many other matters quite outside the range of palace and kitchen. It might have been as well for the world if they had stuck to dumplings.—Youth's Companion.

Worthy Life Lives In Memory.

When the sun goes below the horizon, he is not set; the heavens glow for a full hour after his departure. And when a great and good man sets, the sky of this world is luminous long after he is out of sight.—Beecher.

How to File Saws

Almost any one with a bit of mechanical ability can learn to file saws. All the equipment necessary is a set of three or four files of various sizes and degrees of fineness and a clamp to hold the blade in while the filing operation is in progress. One must learn to hold the file evenly and to draw it back and forth with even pressure the full length of the cutting surface. It does not injure the file or the work to pull it back in contact with the cut surface, even though many careful workmen seem to think that it does and prefer to lift it each time. The set of the teeth of the saw should be carefully noticed before the work begins.

Never use a file on tools more highly tempered than the file itself, for this will ruin it. One set of files should be kept for the hard metals, such as iron and steel, and another for such soft metals as the artisan is often called to cut, like brass.

The Cynic.

A cynic is in many instances a super-idealizer who believes the world could be perfect by rectifying a few slight errors which he takes the trouble to point out.

Ford
THE UNIVERSAL CAR

Forecasting A Tremendous
Spring Demand

739,626

more Ford cars and trucks were produced last year than the previous year, an increase of over 50 per cent.

In spite of this tremendous increase in production, it was impossible to meet delivery requirements during the spring and summer months when orders for 350,000 Ford Cars and Trucks could not be filled.

This year winter buying for immediate delivery has been more active than ever before—and in addition 200,000 orders have already been booked through the Ford Weekly Purchase Plan for spring delivery.

These facts clearly indicate that the demand during this spring and summer will be far greater than ever, and that orders should be placed immediately with Ford Dealers as a means of protection against delay in securing your Ford Car or Truck or Fordson Tractor.

Ford Motor Company
Detroit, Michigan

A small deposit down, with easy payments of the balance arranged, or your enrollment under the Ford Weekly Purchase Plan, will put your order on the preferred list for spring delivery.

Scottish Superstition.
A death in the family. It is believed in many parts of Scotland, is sure to follow if a flowering hawthorn is brought into the house. Among the "sea-going" superstitions of Scotland are those which prevent a Scotch sailor from speaking of any four-footed animal while on the sea. lest he come into bad fortune, and the notion that the fish will be frightened away if a fisherman should pass a bare-footed woman before boarding his ship.

Profit in Coining Money.
The government does not profit at all when gold money is lost, because it has an intrinsic value that is virtually the same as its face value. The profit on lost silver money depends on the cost to the government of the silver that goes into the dollar. When silver is above \$1.20 an ounce there is no profit. When it goes below a dollar the profit is considerable. On lost nickels and one-cent pieces the percentage profit is large.

PAST RECORDS

Are a Better Character Reference Than Future Hopes.

If you haven't as yet saved any money, things don't look so well in your case. Consider the reason. How much of your money slips away uselessly? Stop this waste. Others manage to save perhaps on less salary.

Circleville, Ohio

SCOPE OF DEPARTMENT WORK IS WIDENED BY PORTABLE EXHIBITS

Staff of the United States Department of Agriculture Moving Picture Laboratory.

(Prepared by the United States Department of Agriculture.)

The use of portable exhibits is one of the very effective means developed in recent years to bring the findings of the United States Department of Agriculture before the people of the country. That this method has become popular is indicated by the estimates made on the number of people reached last year at various types of fairs, shows and meetings. The office of exhibits prepared attractive models, scenes and charts for use at 100 places in this country and for the Brazilian International exposition at Rio de Janeiro, Brazil. Rough estimates, based on the attendance at the various places, indicates that department findings were communicated to nearly 8,000,000 persons in this country.

Where Exhibits Were Made.

Of the 101 exhibits made, 3 were at expositions of international scope, 1 at Chicago, 1 at Portland, Ore., and the other in Brazil; 23 were at state fairs or shows of similar nature; 11 at interstate fairs; 28 at regional fairs; 5

were presented during farmers' weeks at agricultural colleges; 1 at a national show in St. Paul, and 30 of the meetings are classified as miscellaneous. They were held in 43 states, the District of Columbia and 1 foreign country.

Along with the improvement in the type of exhibits sent out by the department has come a greatly increased demand for them from many parts of the country. So far it has been impossible to comply with all the requests. The exhibits now used are designed to convey, in a way to persuade acceptance of recommendations made as a result of department research, lessons concerning crops, products or practices. Distribution is carefully looked after so that different sections will get only such exhibits as will be of greatest interest there.

State colleges and various organizations co-operate with the Department of Agriculture in making exhibits, which has had a beneficial effect in stimulating closer co-operation.

Oat Improvement Plan Secures Good Results

Superiority of Cornelian Variety Shown.

(Prepared by the United States Department of Agriculture.)

Sometimes we are prone to think that practices advanced by the extension service are slow to become general farm practices. Many times it is necessary to look over a long period of years to witness results. This is not so, however, in Dutchess county, N. Y., according to reports to the United States Department of Agriculture. In this county the superiority of Cornelian oats has been demonstrated. This year commendable tangible results were forthcoming. In all, 3,000 bushels of these new oats have definitely been put in the ground.

This is how the seed improvement program has been worked. The following example is but typical of the work in other communities. The county agent met with the Millerton community committee and, in planning their program, they desired to stress the importance of a larger acreage of improved oats. With the data on the variety demonstrations which had already been in that community, the committeemen had a selling point that could not be discounted, as the demonstration was held under local conditions. The committeemen brought this to the attention of the growers and, as a result, one carload of oats and 200 bushels of Alpha barley were ordered.

The publicity that this program developed has spread to other communities until the oat improvement program has been like an epidemic. Further co-operation was secured through local warehouse men, who distributed this improved sort. Fully 1,000 acres of oats were sown in Dutchess county as a result of the campaign.

Dust Bath for Chickens

Kills Harmful Insects

Many people are not aware of the fact that dust acts as an insecticide to rid poultry of lice and mites. Have you ever noticed how a hen enjoys a dust bath? If no dust can be found she will wallow out a hole in the ash or clinder pile and dust herself from head to foot. It is a well-known fact that lice and mites are more troublesome in damp weather, simply because no dust can be found. When the hen takes a dust bath she is following nature's law to fight insect pests. If your chickens cannot enjoy a dust bath on account of wet weather, a box should be placed in a dry place where it will always be in the dry. If no dust can be found use clean wood ashes, or coal ashes with the clinders sieved out. You can improve this by adding a small amount of insect powder to the ashes.

Kill Horse Nettles by

Keeping Them Cut Close

The only way to kill horse or bull nettles is to keep them from growing from July to December. They must store some food in their roots sometime before winter, and they get this food out of their tops, but when the tops are kept cut close to the ground all fall there is no way the plants can get food to store in their roots, and if they store none they will die during the winter.

Metals Are Transparent When Subjected to Heat

Very thin films of certain metals become transparent at heats not nearly sufficient to melt them. For instance, if we take a sheet of gold leaf somewhat thinner than the paper on which this is printed and heat it by an electrical current to temperature of about 2,400 degrees Fahrenheit, it will become as transparent as a pane of green-colored glass. If carefully kept from drafts very much finer sheets of gold leaf can thus be heated by clamping them on frames of marble or slate and applying the current through the metal strips which clamp each end of the sheet.

When this is done with gold leaf of about one-hundredth the thickness of ordinary paper and the current is gradually increased until the temperature reaches 3,000 degrees Fahrenheit, the leaf becomes not only translucent, but transparent, so that it is actually possible to see through it. For apparently the same reason silver foil, which requires only 2,250 degrees to make it clearly transparent, shows a bluish-violet tint. Copper foil has also been made transparent in this way, but remains so only for a short time, as it combines with the oxygen of air when thus heated, and the resulting compound is not transparent.

Was He Hitting at Her?

"Robert," said his wife, "here's an article which says that good humor makes the ideal home."

"That's all right, my dear," he replied. "Doesn't it say, too, that good dinners are the basis of good humor?" —Boston Transcript.

Oat Improvement Plan Secures Good Results

Superiority of Cornelian Variety Shown.

(Prepared by the United States Department of Agriculture.)

Sometimes we are prone to think that practices advanced by the extension service are slow to become general farm practices. Many times it is necessary to look over a long period of years to witness results. This is not so, however, in Dutchess county, N. Y., according to reports to the United States Department of Agriculture. In this county the superiority of Cornelian oats has been demonstrated. This year commendable tangible results were forthcoming. In all, 3,000 bushels of these new oats have definitely been put in the ground.

This is how the seed improvement program has been worked. The following example is but typical of the work in other communities. The county agent met with the Millerton community committee and, in planning their program, they desired to stress the importance of a larger acreage of improved oats. With the data on the variety demonstrations which had already been in that community, the committeemen had a selling point that could not be discounted, as the demonstration was held under local conditions. The committeemen brought this to the attention of the growers and, as a result, one carload of oats and 200 bushels of Alpha barley were ordered.

The publicity that this program developed has spread to other communities until the oat improvement program has been like an epidemic. Further co-operation was secured through local warehouse men, who distributed this improved sort. Fully 1,000 acres of oats were sown in Dutchess county as a result of the campaign.

Dust Bath for Chickens

Kills Harmful Insects

Many people are not aware of the fact that dust acts as an insecticide to rid poultry of lice and mites. Have you ever noticed how a hen enjoys a dust bath? If no dust can be found she will wallow out a hole in the ash or cinder pile and dust herself from head to foot. It is a well-known fact that lice and mites are more troublesome in damp weather, simply because no dust can be found. When the hen takes a dust bath she is following nature's law to fight insect pests. If your chickens cannot enjoy a dust bath on account of wet weather, a box should be placed in a dry place where it will always be in the dry. If no dust can be found use clean wood ashes, or coal ashes with the cinders sieved out. You can improve this by adding a small amount of insect powder to the ashes.

Kill Horse Nettles by

Keeping Them Cut Close

The only way to kill horse or bull nettles is to keep them from growing from July to December. They must store some food in their roots sometime before winter, and they get this food out of their tops, but when the tops are kept cut close to the ground all fall there is no way the plants can get food to store in their roots, and if they store none they will die during the winter.

Metals Are Transparent When Subjected to Heat

Very thin films of certain metals become transparent at heats not nearly sufficient to melt them. For instance, if we take a sheet of gold leaf somewhat thinner than the paper on which this is printed and heat it by an electrical current to temperature of about 2,400 degrees Fahrenheit, it will become as transparent as a pane of green-colored glass. If carefully kept from drafts very much finer sheets of gold leaf can thus be heated by clamping them on frames of marble or slate and applying the current through the metal strips which clamp each end of the sheet.

When this is done with gold leaf of about one-hundredth the thickness of ordinary paper and the current is gradually increased until the temperature reaches 3,000 degrees Fahrenheit, the leaf becomes not only translucent, but transparent, so that it is actually possible to see through it. For apparently the same reason silver foil, which requires only 2,250 degrees to make it clearly transparent, shows a bluish-violet tint. Copper foil has also been made transparent in this way, but remains so only for a short time, as it combines with the oxygen of air when thus heated, and the resulting compound is not transparent.

Was He Hitting at Her?

"Robert," said his wife, "here's an article which says that good humor makes the ideal home."

"That's all right, my dear," he replied. "Doesn't it say, too, that good dinners are the basis of good humor?" —Boston Transcript.

Shared Fame With Friend.
It is said that virtually all the plays to which the names of Beaumont and Fletcher are attached were written by Fletcher alone. Beaumont was a friend of Fletcher's and lived with him, they had a kind of David and Jonathan affection for each other and Beaumont's name is said to have gone on the plays more for sentimental reasons than for any other.

DR. E. J. EMRICK
New Chief Juvenile Research to Take Post-Graduate Course.
Dr. E. J. Emrick, newly appointed chief of the bureau of juvenile research has announced that he will go to New York City in the near future to take a post-graduate course at Columbia university in nervous and mental diseases.
The selection of Dr. Emrick as head of the bureau was indorsed recently by the Academy of Medicine in resolutions congratulating the state on the wisdom of its choice.
Dr. Emrick's record as superintendent of the institution of feeble minded was cited as a sufficient guarantee that the "bureau of juvenile research will be revived and developed into the scientific institution originally conceived by its director."

BONDS SOLD.
The bids for \$7,500 bonds, covering the improvements of the city building, were opened today at noon by City Auditor Mrs. Ella Lindsay in the presence of the finance committee of council; Lee T. Shaner, W. F. Baker and Frank Kilne.

SUCCESSFUL CATTLE FEEDER

John C. Stevenson Has Instructive Paper on Important Farm Industry.

Hereford Stock From Texas Ranches Proved Profitable—Gives Detailed Account of Methods From Time Cattle Received Until Marketed.

The following by John C. Stevenson, of Jackson township, one of our best known progressive farmers, will be found both interesting and profitable:
"We have found it profitable, within the past six years to buy the Hereford breed of cattle from the Texas ranches. The calves, weighing about 400 pounds are shipped here around the tenth of November. They come uniform in size, color and are of good quality. Under the old method of buying home raised cattle so many times we had to take 'scrubs' to get the good ones we wanted. These would be of different breeds, colors and sizes. After they are finished they will not harmonize like the Herefords and therefore will not sell as well.

"We turn the calves on good grass as soon as we get them home. Grass is what they have been eating and it makes an excellent starter. They are wintered over on fodder, ensilage and alfalfa hay. They make a fine growth and are in good flesh when put on spring pasture. Before turning out, and before fly time we de-horn them.

"With good grass and water these calves will make an average gain of 300 or more pounds before the first of November, which gives them a total weight of 700 pounds.

"This brings us up to turning into the feed lot. We have a large shed 38x84, open on the southeast side, with bent in one end for hay and bedding and silo and corn crib on the other end. An ensilage carrier, for ensilage and corn, goes down the center of the shed over the feed boxes. This arrangement saves labor and time. The entire floor space in the shed is cemented in with an additional 4000 square feet in the outside lot.

"In starting the cattle on feed, they are given all the ensilage, corn, fodder and alfalfa they will eat, with an additional pound of cotton seed meal per steer. Since they are cattle younger than three or four years they can not handle so much bulk to obtain the required amount to protein, so they are fed cotton seed meal.

"The ensilage is reduced some and husked corn is added until the cattle are on full feed and while on full feed they are allowed to eat all the ensilage they want.

"The day's ration; in the morning, corn fodder and broken husked corn in ear; at noon, alfalfa; in the evening into clean boxes, ensilage mixed with cotton seed meal and broken ear corn. When the boxes are cleaned there should be a little corn left to show they are getting plenty.

"Owing to conditions of cattle when put on feed and spring market price the feed period varies to 120 to 150 days. The main point is to have them all 'finished' so they will 'top the market.' Many times this will bring from \$1 to \$1.50 more per hundred weight. If we do not sell them before they are 'finished' we ship them ourselves to Buffalo. To cut down the shrinkage in shipping the last day they are fed just timothy and corn.

"We carry enough hogs to keep the corn cleaned up while the cattle are being fed. When the hogs are put in with the cattle, we attempt to put there hogs weighing at least 100 pounds. If their weight is less they pile together to keep warm in cold weather; greater weight lessens the danger of being trampled. We find it advisable to carry a hog and a half to the steer. As these hogs grow we give extra corn.

"One can see the profit in carrying hogs along in the lot with cattle. All the corn dropped by the cattle and lost entirely to them is there for the hogs.

"Before we cemented the lot outside the shed, the cattle generally walked thru mud a foot deep, in mild and wet weather, which prevented their going to the trough many times for water, when they should have gone. Formerly a large number had sore feet, a disease taken up by the cattle the following year because the germ was left in the soil. Now, the cement is washed clean by the rains, after the manure is removed each summer.

"This manure, the very best of stock manure that can be obtained is easily taken up and put into the spreader for use in the fields. Within a year, the cement floor out of cover has saved from fifteen to eighteen loads of manure which formerly was tramped into the mud by the stock.

"The manure in the shed can be

hauled at any time that the fields will permit it. From the poorest ground, spread with this manure the first year's corn crop yielded an extra three pecks to a shock or fifteen bushels more to an acre. When wheat followed, we gained three to five bushels per acre. The second year for corn showed an increase of one-half bushel per shock; the wheat again showed a noticeable improvement from two to three bushels per acre.

"Feeding cattle gives steady employment to a hired man the year around. This enables one to hold a better laborer. These minor profits summed up add to the major profit of cattle feeding."

RED MEN ENTERTAIN.

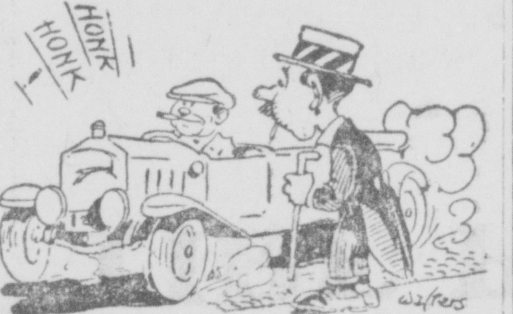

Sioux tribe, Improved Order of Red Men, was host Monday night at its wigwam, 2663 North High street, to the associations of past sachems of the order and past chiefs of the Daughters of Pocahontas of Ohio. L. E. Miller, of Circleville, great sachem of Ohio; Mrs. Mattie Setterfield, 32 South Washington avenue, great Pocahontas of Ohio; Mrs. O. Thompson, 32 Chittenden avenue, president of past chiefs Pocahontas for central Ohio; Henry Hohenhauser of Columbus past great sachem and C. H. Foster of Columbus, president of past sachems were the speakers for the occasion.—Columbus Dispatch.

ELECTED DIRECTOR.

At the annual stockholders' meeting of the Columbus Joint Stock Land bank held in Columbus Tuesday Charles G. Shulze, president of the Third National bank, of this city, was elected director.
